UGREEN W528

UGREEN MagFlow MagSafe Charger Stand

Model: W528

1. INTRODUCTION

The UGREEN MagFlow MagSafe Charger Stand is a versatile 2-in-1 wireless charging solution designed for convenience and efficiency. It allows simultaneous charging of your iPhone (16/15/14/13/12 series) and AirPods (3/2/Pro), eliminating the need for multiple cables and chargers. Its compact, foldable design makes it ideal for both home and travel use, offering adjustable viewing angles for optimal user experience.

Key features include strong magnetic alignment for secure device placement, superior safety protections against over-temperature, foreign objects, and short circuits, and a durable construction with a silicone charging surface to prevent scratches.

2. SAFETY INFORMATION

Please read and follow all safety instructions carefully before using this product to prevent injury or damage.

- Do not expose the device to liquids, moisture, or extreme temperatures.
- Avoid dropping, disassembling, or attempting to repair the device yourself.
- Ensure proper ventilation around the charger during use.
- The charger features built-in over-temperature, foreign object detection, and short circuit protection for a safer charging experience.
- The iPhone charging surface is made of silicone to prevent scratches to your device.
- Keep out of reach of children.

3. PACKAGE CONTENTS

Verify that all items are present in the package:

- 1x UGREEN MagFlow Magnetic Wireless Charger Stand
- 1x 3.3 ft USB-C to USB-C Cable
- 1x User Manual

Note: A USB-C wall charger (power adapter) is not included and must be purchased separately. For optimal charging efficiency, a charger above 30W is recommended.

5. SETUP

1. **Unfold the Stand:** Gently unfold the UGREEN MagFlow charger stand to your desired angle. The stand supports a folding angle from 0 to 70 degrees, allowing for various viewing positions.

2. **Connect Power:** Connect one end of the provided USB-C to USB-C cable to the USB-C port on the back of the charger stand. Connect the other end of the cable to a compatible USB-C power adapter (not included). For optimal charging performance, use a power adapter with an output of 30W or higher.
3. **Placement:** Place the charger stand on a stable, flat surface. The base includes a counterweight iron for added stability.

Perfect for iPhone and AirPods

For iPhone Series 7.5W

6. OPERATION

Charging Your iPhone

1. Ensure your iPhone is compatible with MagSafe charging (iPhone 16/15/14/13/12 series).
2. For optimal magnetic attachment and charging, use a MagSafe-compatible phone case or charge with a bare phone. Non-magnetic cases may hinder performance.
3. Align your iPhone with the magnetic charging pad on the stand. The strong magnetic ring will securely hold your iPhone in place.
4. Your iPhone can be charged in both vertical and horizontal orientations, supporting StandBy mode for convenient viewing of time and notifications.

Charging Your AirPods

1. Place your AirPods charging case (AirPods Pro 2/1, AirPods 3/2, Galaxy Buds, and most Qi-supporting devices) on the designated wireless charging area at the base of the stand.
2. Ensure the AirPods case is centered on the charging area for proper alignment.

7. MAINTENANCE

- **Cleaning:** Disconnect the charger from the power source before cleaning. Use a soft, dry cloth to wipe the surface of the charger. Do not use abrasive cleaners or solvents.
- **Storage:** When not in use, store the charger in a cool, dry place, away from direct sunlight and extreme temperatures. The foldable design allows for compact storage.
- **Protection:** The iPhone charging surface is made of silicone to prevent scratches. Avoid placing sharp or heavy objects on the charging surfaces.

8. TROUBLESHOOTING

Device Not Charging

- **Check Power Connection:** Ensure the USB-C cable is securely connected to both the charger stand and the power adapter, and that the power adapter is plugged into a working wall outlet.
- **Power Adapter Output:** Verify that your USB-C power adapter provides sufficient power (30W or higher recommended for optimal performance).
- **Device Alignment:** For iPhone, ensure it is properly aligned with the magnetic charging pad. For AirPods, ensure the case is centered on the base charging area.
- **Phone Case:** If using a phone case, ensure it is MagSafe-compatible. Thick or non-magnetic cases may interfere with charging. Try charging without the case.
- **Foreign Objects:** Remove any foreign objects (e.g., metal, credit cards) between the device and the charging surface.
- **Restart Device:** Try restarting your iPhone or AirPods.

Slow Charging

- **Power Adapter:** Ensure you are using a power adapter of 30W or higher. Lower wattage adapters will result in slower charging speeds.
- **Background Apps:** Close any power-intensive applications running on your iPhone.
- **Temperature:** Extreme temperatures can affect charging speed. Ensure the charger and device are in a well-ventilated area.

LED Indicator Not Working

- Refer to the "LED Indicator Status" table in the Operation section. The LED light is designed to turn off when only an iPhone is charging.
- If the LED does not illuminate when AirPods are charging or when both devices are charging, check the power connection and try a different power outlet.

9. SPECIFICATIONS

Feature	Detail
Model Number	W528
Product Dimensions	4.6 x 2.6 x 0.9 inches
Item Weight	11.3 ounces
Connectivity Technology	Wireless
Connector Type	USB Type C
