

Sunrio Sunrio Inflatable Pool

Sunrio Inflatable Top Ring Swimming Pool Instruction Manual

Model: Sunrio Inflatable Pool

Brand: Sunrio

PRODUCT OVERVIEW

This manual provides essential information for the safe and efficient setup, operation, and maintenance of your Sunrio 12' x 33" Round Inflatable Top Ring Above Ground Swimming Pool. Designed for family enjoyment, this pool offers a refreshing swimming experience in your outdoor garden or backyard.

Key Features

- **Family-Size Design:** Features a 12-foot diameter and 33-inch height, with a water capacity of 1697 gallons, suitable for adults and children.
- **Durable Construction:** Made from safe, BPA-free, lead-free PVC material that meets international children's toy standards, designed to reduce puncture risks and ensure long service life.
- **Quick Setup:** Can be inflated in approximately 1 minute with an electric air pump (not included) and ready for water in as little as 15 minutes, featuring a built-in curve valve and individual air chamber for convenient inflation and deflation.
- **Integrated Filter Pump:** Includes a 530 GPH filter pump for water circulation and filtration.

Heavy-duty PVC
More stable & puncture resistance

Polyester Mesh
Enhance toughness

Tough PVC Tape
Resistant to abrasion & UV

MULTI-LAYER MATERIAL

SAFETY INFORMATION

WARNING: Drowning Hazard. Children, especially children under 5 years, are at high risk of drowning. Closely watch children who are in or near this pool. Empty or secure pool when not in use.

- Always supervise children in and around the pool.
- Do not dive or jump into the pool.
- Ensure the pool is placed on a level, stable surface.
- Keep electrical devices away from the pool.

- Read and understand all instructions before setting up and using the pool.

PACKAGE CONTENTS

Verify that all components are present before beginning assembly:

- 1 x Sunrio Inflatable Swimming Pool (12FT x 33IN)
- 1 x 530 GPH Filter Pump
- Instruction Manual (this document)
- Repair Patch (may be included)

SETUP

1. Site Preparation

1. Choose a flat, level area in your garden or backyard, free from sharp objects, debris, or uneven ground.
2. Clear the area of any rocks, sticks, or other items that could puncture the pool.
3. Ensure the chosen location is near a suitable power outlet for the filter pump, protected by a Ground-Fault Circuit Interrupter (GFCI).

2. Pool Inflation

1. Unfold the pool and lay it flat in the prepared area.
2. Locate the inflation valve on the top ring of the pool.
3. Using an electric air pump (not included), inflate the top ring until it is firm but not over-inflated. The pool should take approximately 1 minute to inflate.
4. Ensure the valve cap is securely closed after inflation.

3. Filter Pump Connection

The included 530 GPH filter pump is essential for maintaining water clarity. Follow these steps for proper installation:

1. Connect the hoses to the designated inlet and outlet ports on the pool and the filter pump as illustrated below. Ensure all connections are secure.
2. Use hose clamps (if provided) to tighten connections with a screwdriver.
3. Once the hoses are connected and the pool is filled with water (see Operating section), allow time for the filter pump chamber to fill with water before operating. Never operate the filter pump dry.
4. Connect the filter pump's electrical power cord into a grounded receptacle protected by a Ground-Fault Circuit Interrupter (GFCI).

INCLUDED ACCESSORIES

Sunrio SAND FILTER PUMP

- Easy pump installation
- Easy-to-clean filter cartridge
- Automatic daily filtration with 2–10 hour cycles
- Pump Flow Rate: **530 GPH**

OPERATING

1. Filling the Pool

1. Ensure the drain valve is securely closed.
2. Begin filling the pool with water using a garden hose.

3. Fill the pool to the recommended water level, typically just below the top inflatable ring. The pool has a capacity of 1697 gallons.
4. Once filled, allow the pool walls to settle and ensure the top ring remains properly inflated.

2. Filter Pump Operation

The 530 GPH filter pump is designed to circulate and filter the pool water. Refer to the pump's specific manual for detailed operating instructions. Generally:

- Operate the pump daily for 2-10 hours, depending on usage and water conditions, to maintain water clarity.
- Ensure the pump is always submerged in water when operating.
- Regularly check the filter cartridge for debris and clean or replace as needed.

3. Water Chemistry

Maintaining proper water chemistry is crucial for a safe and enjoyable swimming experience. Consult a local pool supply store for guidance on appropriate chemicals and testing kits for inflatable pools. Always follow chemical manufacturer instructions carefully.

MAINTENANCE

1. Routine Cleaning

- Regularly remove leaves, insects, and other debris from the pool surface using a skimmer net.
- Brush the pool walls and floor to prevent algae buildup.
- Clean the filter pump cartridge frequently (e.g., every few days) by rinsing it with a garden hose. Replace the cartridge every 2-4 weeks, or as needed, depending on usage.

2. Water Level Management

- Monitor the water level regularly. Evaporation and splashing will reduce the water level. Refill as necessary to maintain the optimal level.
- If heavy rain occurs, consider partially draining the pool to prevent overflow and stress on the pool structure.

3. Winterization and Storage

For prolonged off-season storage, proper winterization is essential:

1. Completely drain the pool using the drain valve.
2. Clean the pool thoroughly with mild soap and water, then rinse and allow it to dry completely to prevent mold and mildew.
3. Deflate the top ring and fold the pool neatly.
4. Store the pool and filter pump in a dry, cool place, away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

This section addresses common issues you might encounter with your Sunrio inflatable pool.

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Pool is losing air/water (leak)	Puncture in the PVC material or loose valve cap.	Locate the leak by applying soapy water to the surface. Use the included repair patch (or a standard PVC repair kit) to seal the puncture. Ensure the inflation valve cap is tightly closed.
Filter pump not working	Not plugged in, GFCI tripped, clogged filter, airlock, or motor issue.	Check power connection and GFCI. Clean or replace filter cartridge. Bleed air from the pump system. If issues persist, contact customer support.
Water is cloudy/green	Insufficient filtration, improper chemical balance, or algae growth.	Increase filter pump operating time. Test water chemistry and adjust chlorine/pH levels. Shock the pool if algae is present. Ensure proper circulation.

Note: Some users have reported leaks. While a repair patch is included, persistent leaks may require contacting customer support.

SPECIFICATIONS

Product Specifications

- **Brand:** Sunrio
- **Model Number:** Sunrio Inflatable Pool
- **Dimensions (Inflated):** 144 inches (12 feet) Length x 144 inches (12 feet) Width x 33 inches Height
- **Water Capacity:** 1697 Gallons
- **Shape:** Round
- **Material:** Polyvinyl Chloride (PVC)
- **Included Components:** 1 x Inflatable Swimming Pool, 1 x 530 GPH Filter Pump
- **Item Weight:** 29.4 Pounds
- **Usage:** Outdoor
- **UPC:** 717206590371, 717206590364

WARRANTY AND SUPPORT

Sunrio is committed to providing high-quality products and reliable customer service. For any questions, concerns, or assistance with your product, please contact our US-based customer support team.

Contact Information:

- Phone: (Refer to product packaging or official website for current phone number)
- Email: (Refer to product packaging or official website for current email address)
- Support Hours: Monday - Friday, 9 am - 5 pm PST

Sunrio offers a 30-day return policy, 24-hour support, and lifetime support for their products, ensuring customer satisfaction.
