ASSEMBLY INSTRUCTIONS

The Feonase bed frame is designed for easy assembly. All components are clearly numbered, and the wooden slats are pre-

attached with Velcro for quick installation. It is recommended to assemble the bed frame with at least two people for optimal ease and safety.

Step-by-Step Guide:

- 1. **Unpack all components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches. Verify that all numbered parts and hardware are present according to the included parts list.
- 2. **Assemble the headboard:** Attach the wingback sides to the main headboard panel using the provided hardware. Ensure all bolts are tightened securely.
- 3. **Connect side rails:** Attach the side rails to the assembled headboard and footboard (if applicable) using the designated connectors.
- 4. **Install center support:** Place the central cross support bars within the frame and secure them.
- 5. **Position wooden slats:** Unroll the wooden slats across the bed frame. The slats are connected by Velcro strips, which will adhere to corresponding strips on the bed frame to prevent movement and reduce noise.

MAINTENANCE

- **Cleaning:** For the upholstered parts, gently vacuum with an upholstery attachment to remove dust. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner following the product's instructions, testing on an inconspicuous area first.

- **Frame Care:** Periodically check all bolts and connections to ensure they remain tight. Retighten if necessary to maintain stability and prevent noise.
- **Charging Station:** Keep the charging ports free of dust and debris. Do not expose the charging station to liquids.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is noisy/squeaks.	Loose bolts or inadequate cushioning between slats and frame.	Ensure all assembly bolts are tightened. Verify that the EVA strips are correctly positioned between the wooden slats and the metal frame to reduce friction.
Devices not charging via USB ports.	Bed frame power cord not plugged in, or device cable issue.	Confirm the bed frame's power cord is securely plugged into a working wall outlet. Try a different USB cable or device to rule out cable/device malfunction. Note that USB charging speed may vary depending on the device and cable.
Mattress slides on the frame.	Improper mattress placement or lack of friction.	Ensure the mattress is centered on the frame. The wingback headboard is designed to help prevent sliding. Consider using a non-slip mattress pad if sliding persists.
