Key Features

The Viribus Womens Cruiser Bike is designed for comfort, convenience, and style, making it ideal for city commuting, beach rides, and leisurely trips. Key features include:

- **Comfort-Oriented Design:** Features a low sloping top tube for easy step-through access, cushioned handlebars, and an adjustable padded saddle for a smooth ride.
- **Durable Construction:** Built with a sturdy carbon steel frame capable of supporting riders up to 242 lbs (110 kg), ensuring longevity and stability.
- **Ample Storage:** Equipped with a spacious front basket and a reinforced rear rack, providing convenient options for carrying personal items, groceries, or pets.
- **Reliable Braking System:** Features front and rear V-brakes for powerful and controlled stopping performance.
- **Enhanced Safety:** Includes nonslip handlebars and pedals, along with three reflectors and a bell for increased visibility and awareness.

- **Single Speed Simplicity:** Utilizes a single speed ATA cassette for straightforward and low-maintenance operation.

Setup Guide

Your Viribus Cruiser Bike requires some assembly. Please follow these instructions carefully. A tool kit is included with your purchase.

1. Unpacking and Inspection

1. Carefully remove all components from the packaging.
2. Inspect all parts for any signs of damage during shipping. Contact customer support immediately if any damage is found.
3. Ensure all listed components are present: bike frame, front wheel, handlebars, seat post with saddle, pedals, front basket, rear rack, and tool kit.

2. Handlebar Installation

1. Insert the handlebar stem into the fork tube.
2. Align the handlebars straight with the front wheel.
3. Tighten the stem bolt securely using the provided tool.

3. Seat Post and Saddle Installation

1. Insert the seat post with the saddle into the frame's seat tube.
2. Adjust the seat height to a comfortable position (your feet should be able to touch the ground while seated).
3. Secure the quick-release lever or bolt firmly.

4. Pedal Installation

1. Identify the left (L) and right (R) pedals.
2. The right pedal (R) threads clockwise into the right crank arm.
3. The left pedal (L) threads counter-clockwise into the left crank arm.
4. Tighten both pedals securely with a wrench.

5. Front Basket and Rear Rack Installation

1. Attach the front basket to the handlebars and front fork using the provided hardware.
2. Secure the rear rack to the designated mounting points on the bike frame.
3. Ensure all bolts are tightened to prevent wobbling.

Image: Close-up views of the spacious front basket, the protective chain fender, and the comfortable cushioned saddle.

6. Brake Adjustment

1. Check that both front and rear V-brakes are properly aligned with the wheel rims.
2. Adjust the brake cable tension so that the brake levers engage firmly without touching the handlebars.
3. Ensure the brake pads make full contact with the rim when applied.

Note: *If you are unsure about any assembly steps, it is recommended to seek assistance from a professional bicycle mechanic.*

Operating Instructions

1. Pre-Ride Safety Check

- **Tires:** Check tire pressure. Ensure tires are inflated to the recommended PSI (usually found on the tire sidewall).
- **Brakes:** Test both front and rear brakes to ensure they engage smoothly and effectively.

- **Handlebars & Seat:** Confirm that handlebars and seat are securely tightened and do not wobble.
- **Reflectors & Bell:** Ensure all reflectors are clean and visible, and the bell is functional.

2. Riding Safely

- Always wear a helmet when riding.
- Obey all traffic laws and signals.
- Be aware of your surroundings and other road users.
- Use hand signals for turns and stops.
- Avoid riding in low visibility conditions without proper lighting.

Image: A woman riding the Viribus Cruiser Bike, illustrating the comfortable and enjoyable riding experience.

3. Adjusting Seat and Handlebars

- **Seat Height:** Loosen the quick-release lever on the seat post. Adjust the seat so that your leg has a slight bend at the knee when the pedal is at its lowest point. Re-tighten the lever securely.

- **Handlebar Height/Angle:** Loosen the stem bolt. Adjust the handlebar height for a comfortable upright riding posture. Ensure the handlebars are straight before re-tightening.

4. Using the Basket and Rear Rack

- The front basket is suitable for lighter items. Avoid overloading to maintain steering control.
- The reinforced rear rack can carry heavier loads. Secure items with bungee cords or straps to prevent shifting during rides.
- Distribute weight evenly to maintain balance.

Image: A detailed view of the reinforced rear rack, highlighting its sturdy construction for carrying additional items.

Maintenance

Regular maintenance will extend the life of your Viribus Cruiser Bike and ensure safe operation.

1. Regular Checks (Before Each Ride)

- **Tires:** Check for proper inflation and inspect for cuts or punctures.
- **Brakes:** Ensure brake levers are firm and brake pads contact the rim correctly.
- **Bolts & Fasteners:** Quickly check that all visible bolts and quick-release levers are tight.

2. Cleaning

- Clean the bike regularly with mild soap and water. Avoid high-pressure washers.
- Dry the bike thoroughly after washing to prevent rust.

3. Lubrication

- Lubricate the chain every few weeks, or more often if riding in wet or dusty conditions. Use bicycle-specific chain lubricant.
- Apply a small amount of grease to pedal threads and seat post when reassembling.

4. Storage

- Store your bike in a dry, covered area to protect it from the elements.
- If storing for extended periods, ensure tires are inflated and the chain is clean and lubricated.

Troubleshooting

This section addresses common issues you might encounter with your Viribus Cruiser Bike.

Problem	Possible Cause	Solution
Brakes feel spongy or don't stop effectively.	Loose brake cable, worn brake pads, misaligned pads.	Tighten brake cable, replace worn pads, adjust pad alignment.
Pedals feel loose or make noise.	Pedals not tightened sufficiently during assembly.	Re-tighten pedals firmly with a wrench (remember left pedal is reverse threaded).
Handlebars or seat wobble.	Stem bolt or seat post quick-release/bolt is loose.	Tighten the respective bolts or quick-release levers securely.
Tires lose air quickly.	Puncture, leaky valve stem, improper inflation.	Inspect for punctures and repair/replace tube, check valve stem, ensure proper inflation.
Chain noise or stiffness.	Lack of lubrication, dirt/grime.	Clean and lubricate the chain.

Note: *For complex issues or repairs, it is recommended to consult a professional bicycle mechanic.*

Specifications

Feature	Detail
Bike Type	Commuting Bike, Cruiser Bike
Age Range	Adult
Brand	Viribus
Number of Speeds	1

Feature	Detail
Colour	Pure White
Wheel Size	26 Inches
