5. MAINTENANCE AND CARE

Proper maintenance will extend the life and preserve the appearance of your U-MAX Wood Pergola.

General Care:

- **Regular Cleaning:** Clean the wood surfaces periodically with a mild soap and water solution. Rinse thoroughly with clean water and allow to air dry. Avoid harsh chemicals or abrasive cleaners.

- **Inspect Fasteners:** Annually, or more frequently if exposed to extreme weather, check all bolts, screws, and connections. Tighten any loose hardware to maintain structural integrity.
- **Wood Treatment:** As a natural wood product, the pergola may benefit from periodic application of a wood sealant or stain to protect against UV damage, moisture, and to maintain its color. Follow the manufacturer's recommendations for wood treatment products.
- **Snow and Wind:** While designed to support snow and wind, it is advisable to clear heavy snow accumulation from the top of the pergola to prevent excessive stress. In areas with severe wind conditions, consider additional anchoring or consult a professional for reinforcement options.
- **Drainage:** Ensure proper drainage around the base of the pergola to prevent water from pooling, which can lead to wood rot over time.
