## 2. PRODUCT FEATURES

- **High Efficiency Filtration:** Features a 2-in-1 filtration system including a HEPA air filter and an activated carbon filter.
- **HEPA Filter:** Designed to capture at least 99.97% of airborne particles as small as 0.3 microns, including dust, pet dander, and pollen.
- **Activated Carbon Filter:** Effectively reduces household odors from smoking, cooking, pets, and volatile organic compounds (VOCs).
- **Optimal Performance:** Recommended replacement every 6 months for maintaining peak air purification performance.

## 3. INSTALLATION INSTRUCTIONS

1. **Power Off:** Ensure your Blueair Blue Pure Mini Max air purifier is unplugged from the power outlet before beginning installation.
2. **Access Filter Compartment:** Refer to your Blueair air purifier's original manual for specific instructions on how to open the filter compartment. Typically, this involves removing the outer fabric pre-filter and then opening the main unit.
3. **Remove Old Filter:** Carefully remove the used filter. It may contain accumulated dust and debris. Dispose of the old filter according to local regulations.
4. **Install New Filter:** Unpack the new isinlive Mini Max Replacement Filter. Insert the new filter into the air purifier, ensuring it is seated correctly and securely. The filter is designed for a precise fit.
5. **Close Compartment:** Close the filter compartment and reattach the outer fabric pre-filter if applicable.
6. **Power On:** Plug the air purifier back into the power outlet.
7. **Reset Filter Indicator:** If your air purifier has a filter replacement indicator, follow the manufacturer's instructions to reset it. This usually involves pressing and holding a specific button for a few seconds.

## 4. MAINTENANCE AND REPLACEMENT

---

For optimal performance and air quality, it is recommended to replace the isinlive Mini Max Replacement Filter every **6 months**. This duration may vary depending on usage frequency, air quality in your environment, and the presence of pets or smokers.

- Regularly check the filter for visible signs of dirt and debris.
- A decrease in airflow or an increase in noise from the air purifier may indicate a clogged filter that needs replacement.
- Do not wash or attempt to clean the filter, as this can damage the filtration media and reduce its effectiveness.

# HIGH FILTRATION $\geq 99.97\%$

We recommend to replace the Mini Max replacement filter every **6-month** for optimal performance.

## 5. TROUBLESHOOTING

If you experience issues after replacing your filter, consider the following:

- **Air Purifier Not Turning On:** Ensure the air purifier is properly plugged into a working outlet and the filter compartment is securely closed. Some purifiers have safety switches that prevent operation if the compartment is open.
- **Reduced Airflow/Efficiency:** Double-check that the filter is installed correctly and not obstructed. If the issue persists, the filter may be due for replacement sooner than expected due to high pollutant levels in the environment.
- **Unusual Odors:** A new filter might emit a slight odor initially, which should dissipate quickly. If strong or persistent odors occur, ensure the filter is genuine and installed correctly.

## 6. SPECIFICATIONS

Attribute	Detail
-----------	--------

Attribute	Detail
Brand	isinlive
Model Number	Mini Max Filter
Compatibility	Blueair Blue Pure Mini Max Air Purifier (FMINI)
Filtration Type	HEPA & Activated Carbon
