Maintenance and Care

Cleaning

To maintain the appearance and longevity of your vanity, wipe all surfaces with a soft, damp cloth. Avoid using abrasive cleaners, harsh chemicals, or excessive moisture, as these can damage the engineered wood finish.

Electrical Components

Always ensure the vanity is unplugged from the power source before cleaning any electrical components, including the mirror and charging station. Use a dry, soft cloth for cleaning electrical parts.

Troubleshooting

Mirror Lights Not Working

- Ensure the vanity's main power cord is securely plugged into a functional electrical outlet.
- Check that the power switch for the integrated charging station (which powers the mirror lights) is in the "ON" position.
- Gently clean the touch sensor on the mirror surface to ensure it is free from dust or debris that might interfere with its responsiveness.

Drawers Sticking or Not Opening Smoothly

- Verify that the drawers are not overloaded with items, which can cause them to stick.
- Inspect the drawer slides for any obstructions, loose screws, or misalignment. Tighten any loose screws and clear any debris.

Sliding Barn Doors Not Moving Smoothly

- Examine the barn door hanging rail and guide grooves for any accumulated dust, debris, or damage. Clean the track if necessary.
