SAFETY INSTRUCTIONS

Your safety and the safety of others are paramount. Follow all safety warnings and instructions to prevent injury or damage.

- Weight Capacity:** The maximum weight capacity for the upper bunk is 200 kg (440 lbs). Do not exceed this limit.
- Age Restriction:** The upper bunk is not suitable for children under 6 years of age.
- Guardrails:** Always ensure guardrails are properly installed and secured on the upper bunk.

- No Horseplay:** Prohibit horseplay on or under the bed.
- Stairs:** Use the stairs for entry and exit only. Do not jump on the stairs.

Using the Bunk Beds

The Moimhear bunk bed provides sleeping space for up to four individuals. The upper bunk is designed for a single mattress (90x200 cm), and the lower bunk accommodates a larger mattress (140x200 cm).

- **Accessing the Upper Bunk:** Use the integrated stair unit to safely access the upper bunk. Always face the stairs when ascending or descending.
- **Guardrails:** Ensure the guardrails on the upper bunk are always in place to prevent falls.

Using the Trundle Bed

The trundle bed provides an additional sleeping area that can be conveniently stored away when not in use.

- **Pulling Out:** Gently pull the trundle bed from underneath the lower bunk. It is equipped with wheels for easy movement.
- **Pushing In:** To store, simply push the trundle bed back into its position under the lower bunk until it is fully recessed.

MAINTENANCE

Regular maintenance will help prolong the life and ensure the safety of your bunk bed.

- **Cleaning:** Wipe down the wooden surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that may damage the finish.
- **Fastener Checks:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connections. Tighten any loose fasteners to maintain structural integrity.
- **Slats Inspection:** Check the wooden slats for any signs of damage, cracks, or warping. Replace any damaged slats immediately.
- **Trundle Wheels:** Ensure the trundle bed wheels are clean and roll smoothly. Remove any debris that may hinder movement.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose fasteners.	Inspect all bolts and screws. Tighten any that are loose using the provided Allen wrench or appropriate tool.
Squeaking noises from the bed.	Loose connections or friction between wood parts.	Tighten all fasteners. If squeaking persists, apply a small amount of paraffin wax or silicone spray to contact points between wooden components.
Trundle bed is difficult to pull out or push in.	Debris in wheels or track; misaligned.	Check wheels for hair, dust, or other debris and clean them. Ensure the trundle is aligned correctly with the main bed frame.
