### Bawetech MAS-503-PLUS-US

# Bawetech Dog Grooming Vacuum Kit Instruction Manual

**Brand:** Bawetech

**Model:** MAS-503-PLUS-US

*Your comprehensive guide to setting up, operating, and maintaining your Bawetech Dog Grooming Vacuum Kit for a clean and happy pet.*

## 1. PRODUCT OVERVIEW AND SETUP

The Bawetech Dog Grooming Vacuum Kit is designed to simplify pet grooming by combining trimming, grooming, and deshedding with powerful vacuum suction to collect pet fur. This ensures a mess-free experience and a tidy home.

Figure 1: Bawetech Dog Grooming Vacuum Kit and Accessories.

The Bawetech Dog Grooming Vacuum Kit includes the main vacuum unit, a flexible hose, and five interchangeable grooming tools: a grooming brush, deshedding tool, electric clippers, cleaning brush, and a narrow nozzle. Various clipper guard combs are also provided for customized grooming lengths.

## Initial Setup:

1. **Unpack Components:** Carefully remove all items from the packaging.
2. **Connect Hose:** Attach the flexible hose to the main vacuum unit by aligning the connectors and twisting until secure.
3. **Attach Tool:** Select the desired grooming tool (e.g., grooming brush) and attach it to the end of the hose. Ensure it clicks firmly into place.
4. **Power On:** Plug the power cable into a suitable electrical outlet. The unit is now ready for use.

*Video 1: Official product video demonstrating the assembly, various attachments, and quiet operation of the Bawetech Dog Grooming Vacuum Kit. It shows the grooming brush, electric clippers, and cleaning tools in action, highlighting the mess-free hair collection.*

## 2. OPERATING INSTRUCTIONS

The Bawetech Grooming Vacuum offers versatile functionality with its powerful suction and various attachments. It features three adjustable suction levels to suit different grooming needs and pet sensitivities.

## Adjusting Suction Levels:

The vacuum unit has a control panel with power and suction level buttons. Press the fan icon button to cycle through the three adjustable suction levels. For pets new to grooming vacuums, it is recommended to start with the lowest setting (below 50 dB) to help them acclimate to the sound and sensation.

Figure 2: Low Noise Design for Pet Comfort.

Designed with a low-noise motor, the grooming vacuum operates below 50dB, making it less likely to startle or stress pets during use. Users can start with the lowest suction level to help pets acclimate.

## Using Grooming Tools:

- **Grooming Brush:** Ideal for daily brushing to remove loose hair and promote a healthy coat. As you brush, collected hair is automatically sucked into the vacuum by pressing the release button on the brush head.
- **Deshedding Tool:** Effectively removes loose undercoat hair, especially useful for pets with thick fur. Use gentle, long strokes in the direction of hair growth.
- **Electric Clippers:** For trimming pet hair to desired lengths. Attach one of the four guide combs (3mm, 9mm, 16mm, 24mm) to the clippers. The vacuum suction ensures cut hair is immediately collected, preventing mess.
- **Cleaning Brush:** Use this tool to clean pet hair from carpets, sofas, and other surfaces.
- **Nozzle:** Provides concentrated suction for cleaning tight corners, crevices, or small debris like nail clippings.

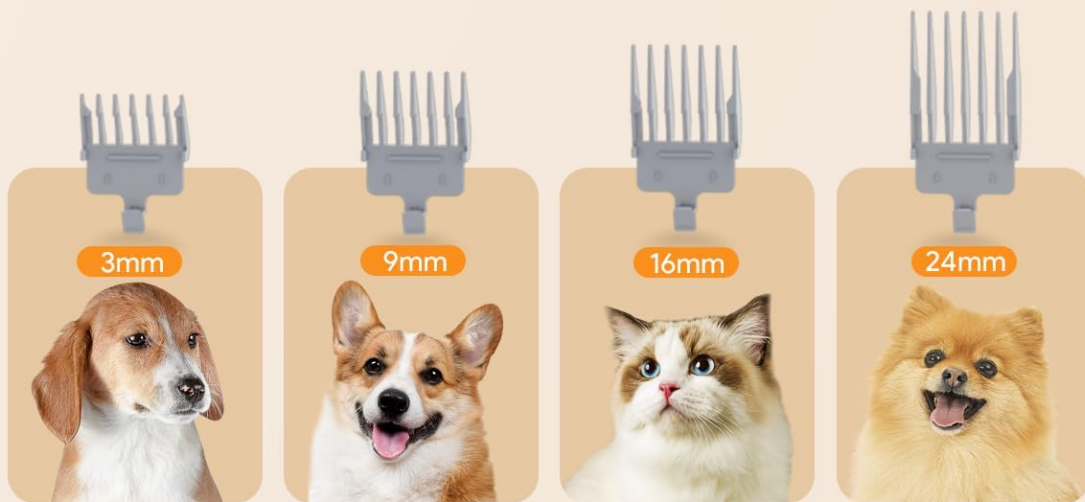

Figure 3: Versatile Tools for Comprehensive Pet Care.

The kit supports various grooming needs: daily brushing to remove loose hair, monthly clipping with adjustable

guards for different hair lengths, and general cleaning of pet hair from surfaces using the specialized cleaning tools.

**Applicable to all types of pets**

*Figure 4: Clipper Guard Combs for Various Hair Lengths.*

The adjustable electric clippers come with four guide combs (3mm, 9mm, 16mm, 24mm) to accommodate different hair lengths and types, suitable for a variety of pets.

### **3. MAINTENANCE**

Regular maintenance ensures the longevity and optimal performance of your Bawetech Grooming Vacuum Kit.

#### **Emptying the Dust Cup:**

The 2.5L large capacity dust cup is designed for easy, contact-free emptying. When the dust cup is full or after each grooming session:

1. Disconnect the power cable from the outlet.
2. Detach the dust cup from the main unit.
3. Open the dust cup lid and dispose of the collected pet hair into a trash bin.
4. Close the lid and reattach the dust cup to the main unit, ensuring it is securely fastened.

## 2.5L Larger Capacity

### One-time contact-free emptying of hair

*Figure 5: Large Capacity Dust Cup for Easy Maintenance.*

The vacuum features a spacious 2.5L dust cup, designed for contact-free hair emptying, reducing the frequency of disposal during grooming sessions.

### **Cleaning Attachments:**

- **Grooming Brush & Deshedding Tool:** After emptying the collected hair, use a damp cloth to wipe down the bristles and surfaces. Ensure they are dry before storage.
- **Electric Clippers:** Detach the blade and guide combs. Use the provided cleaning brush to remove any trapped hair. Wipe the blades and combs with a clean, dry cloth. For optimal performance, a drop of clipper oil can be applied to the blades periodically.
- **Hose & Main Unit:** Wipe the exterior of the hose and main unit with a soft, damp cloth. Do not immerse the main unit in water.

## 4. TROUBLESHOOTING

If you encounter any issues with your Bawetech Dog Grooming Vacuum Kit, please refer to the following common troubleshooting tips:

- **No Power:** Ensure the power cable is securely plugged into both the unit and a working electrical outlet. Check if the outlet is functional by plugging in another device.
- **Low Suction:** Verify that the dust cup is not full and is properly attached. Check the hose and attachments for any blockages. Clean the filter if it appears clogged with hair or debris.
- **Attachments Not Working:** Ensure the attachment is securely connected to the hose. For electric clippers, check that the blade is properly seated and not damaged.
- **Unusual Noise:** This could indicate a blockage in the hose or attachments, or a full dust cup. Clear any obstructions and empty the dust cup. If the issue persists, discontinue use and contact customer service.

*For persistent issues or concerns not addressed here, please contact Bawetech Customer Service for assistance.*

## 5. SPECIFICATIONS

Feature	Detail
Product Dimensions	13.27 x 5.12 x 7.48 inches; 8.53 Pounds
