Onix Z5

Onix Pickleball Z Series Paddles Instruction Manual

Brand: Onix

Model: Composite Z5 - Black

PRODUCT OVERVIEW

The Onix Z Series Pickleball Paddles, including the Composite Z5, are designed for players seeking a balance of power and control. These paddles feature a widebody shape for an expanded sweet spot and a specialized core for enhanced performance on the court.

SETUP

The Onix Z Series Pickleball Paddle comes ready for immediate use. No assembly is required.

- **Unpackaging:** Carefully remove the paddle from its packaging.
- **Grip Check:** Ensure the grip is securely wrapped and comfortable for your hand. If desired, an overgrip can be added for personalized feel and absorption.
- **Inspection:** Before first use, visually inspect the paddle for any signs of damage from shipping.

OPERATING THE PADDLE

The Onix Z Series paddle is designed to enhance your pickleball game through its specific features:

- **Ball Control:** The Nomex, paper honeycomb core provides excellent power while maintaining good ball control, particularly for delicate shots like dinks at the net.
- **Increased Pop:** The paddle's construction offers more "pop" from the baseline, allowing for powerful drives and serves.
- **Widebody Shape:** The widebody design maximizes the sweet spot, increasing forgiveness on off-center hits and improving overall contact with the ball.
- **Heavy-Hitting Power:** With a heavy-weight design (8.4-9.2 oz), the paddle delivers substantial power for aggressive play.

MAINTENANCE

Proper maintenance will extend the life and performance of your Onix Pickleball Paddle:

- **Cleaning:** Wipe the paddle surface with a damp cloth to remove dirt and sweat. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store the paddle in a cool, dry place away from direct sunlight and extreme temperatures. Excessive heat or cold can affect the paddle's core and surface materials.
- **Grip Care:** If the grip becomes worn or loses its tackiness, consider replacing it with a new pickleball overgrip or replacement grip.
- **Edge Guard:** Periodically check the edge guard for any signs of wear or damage. While designed for protection, severe impacts can compromise its integrity.

TROUBLESHOOTING

If you encounter any issues with your Onix Pickleball Paddle, consider the following common solutions:

- **Reduced Pop or Power:**
 - Ensure you are hitting the ball within the paddle's sweet spot.
 - Check for any visible damage to the paddle face or core that might affect performance.
- **Slippery Grip:**
 - Clean the grip with a mild soap and water solution, then allow it to air dry completely.
 - If the grip is worn, replace it with a new one for better traction.
- **Unusual Noises or Vibrations:**
 - Inspect the paddle for any cracks or loose components, especially around the edge guard and handle.
 - If significant damage is found, discontinue use and contact customer support.

SPECIFICATIONS

| Feature | Detail |
|--------------------------|--|
| Model Name | Composite Z5 - Black |
| Brand | Onix |
| Core Material | Nomex, Paper Honeycomb Core |
| Face Material | Fiberglass / Composite |
