luckystyle E26

luckystyle Smart Light Bulbs

MODEL: LK-E26-01 USER MANUAL

Introduction

Thank you for choosing luckystyle Smart Light Bulbs. These 9W A19 E26 LED bulbs offer 800 lumens of brightness, 16 million colors, and tunable white light (2700K-6500K). They are designed for easy integration into your smart home system, supporting both WiFi and Bluetooth connectivity, and are compatible with Alexa and Google Assistant. This manual provides detailed instructions for setup, operation, and maintenance to ensure optimal performance.

Safety Information

- **Electrical Safety:** Ensure power is turned off at the switch before installing or removing the bulb. Do not use in wet locations or fully enclosed fixtures.
- **Compatibility:** Use only in E26 standard sockets. Not suitable for dimmers unless specified by the manufacturer.
- **Operating Temperature:** Avoid extreme temperatures. Refer to specifications for operating range.
- **Disposal:** Dispose of electronic components responsibly according to local regulations.

Package Contents

- Smart Light Bulb(s) (Quantity as per purchase)
- User Manual

Note: Specifications are subject to change without prior notice.

Setup

1. Physical Installation

- Power Off:** Ensure the power switch to the light fixture is in the OFF position before installation.
- Install Bulb:** Carefully screw the luckystyle Smart Light Bulb into a standard E26 socket. Do not overtighten.
- Power On:** Turn the power switch to the ON position. The bulb should light up.

2. App Download and Account Creation

The luckystyle Smart Light Bulbs are controlled via the**Surplife App**. Ensure your phone's Bluetooth and Wi-Fi are enabled.

- Download App:** Scan the QR code provided in the product packaging or search for "Surplife" in your smartphone's app store (App Store for iOS, Google Play Store for Android).
- Register/Login:** Open the Surplife App. If you are a new user, select "Sign Up" and follow the prompts to create an account using your email and a verification code. If you already have an account, select "Log In".

1. Connect the Smart Light Bulbs to Surplife

Please keep your phone as close as possible to the device you want to add

Image: Step-by-step guide showing how to connect the smart light bulbs to the Surplife app, including enabling Bluetooth and Wi-Fi, adding a device, selecting a network, and entering the Wi-Fi password.

3. Connecting to Wi-Fi

The bulbs require a 2.4GHz Wi-Fi network for initial setup. Ensure your phone is close to the device.

1. **Add Device:** In the Surplife App, tap the "+" icon in the top right corner or select "Add device". The app will automatically search for nearby devices.
2. **Select Device:** Tap on the detected smart light bulb from the list.
3. **Select Network:** Choose your 2.4GHz Wi-Fi network and enter the password.
4. **Confirm Connection:** The app will confirm when the device has been successfully added. You can then rename the device (e.g., "Bedroom Lamp") and assign it to a specific room.

4. Voice Assistant Integration (Alexa/Google Home)

After connecting the bulbs to the Surplife App, you can link them with Alexa or Google Home for voice control.

1. **Access Profile:** In the Surplife App, go to the "Profile" section (usually located at the bottom right).
2. **Third-Party Voice Services:** Select "Third-Party Voice Services" and choose either "Alexa" or "Google Assistant".
3. **Link Account:** Follow the on-screen instructions to sign in with your Amazon or Google account and link it with Surplife. This typically involves enabling the Surplife skill/action in the respective voice assistant app.
4. **Discover Devices:** Once linked, your smart bulbs should appear in your Alexa or Google Home app, ready for voice commands.

2. Connect to Alexa, Google Home

Note: Please connect the bulbs to the Surplife app first, then link Surplife with Alexa/Google Home

Operating Instructions

1. Basic Control (via Surplife App)

- **On/Off:** Tap the power icon next to the device name to turn the bulb on or off.
- **Brightness:** Use the slider to adjust the brightness from 1% to 100%.
- **Color Change:** Select from 16 million RGB colors using the color wheel or preset color options.
- **White Light Adjustment:** Switch between warm white (2700K) and cool white (6500K) to suit your preference.

Image: A living room demonstrating tunable white light, ranging from warm (2700K) to cool (6500K).

Image: A room illustrating the 1%-100% brightness dimmable feature of the smart light bulbs.

2. Voice Control

Once linked with Alexa or Google Assistant, use simple voice commands to control your bulbs. Examples:

- "Alexa, turn on Bedroom Lamp."
- "Hey Google, set Living Room light to blue."
- "Alexa, dim Kitchen lights to 50%."
- "Hey Google, change Studio light to warm white."

Hands-Free Voice Control

Hands-free control with simple voice commands

Image: A person in a living room using voice commands with an Alexa device to control the smart light bulbs.

3. Music Sync

The bulbs can change color and brightness in sync with music detected by your phone's microphone. To use this feature:

1. **Enable Microphone:** In the Surplife App, ensure microphone permissions are enabled for the app.
2. **Activate Music Mode:** Select the music sync mode within the app. The bulbs will respond to sounds from your phone.

Explore Endless Possibilities

Image: A vibrant scene with smart light bulbs changing colors to music, with musical notes floating around.

4. Timer and Schedule

Automate your lighting with the timer and schedule functions:

- **Set Timers:** Use the timer function to automatically turn bulbs on or off after a set duration.
- **Create Schedules:** Program daily routines, such as brightening lights in the morning (Sunrise mode) or gradually dimming them in the evening (Sunset mode).

Image: A smartphone screen displaying the timer mode, with options for setting lights to turn off at 8 AM and on at 10 PM, alongside sleeping individuals.

5. Group Control

Control multiple bulbs simultaneously by grouping them in the Surplife App. Up to 6 to 8 light bulbs can be controlled together.

6. Scene Modes

Explore various pre-set dynamic scenes or create your own custom lighting effects within the app to match your mood or occasion.

Multiple Scenarios

Experience different colors

Image: A cross-section of a house showing different rooms illuminated with various colors, demonstrating multiple lighting scenarios.

Maintenance

- **Cleaning:** Ensure the bulb is off and cool before cleaning. Wipe with a soft, dry cloth. Do not use liquid cleaners.
- **Storage:** Store bulbs in a cool, dry place when not in use for extended periods.

Troubleshooting

- **Bulb Not Responding:**

- Check if the bulb is properly screwed into the socket and the power switch is ON.
- Ensure your Wi-Fi network is active and the bulb is within range.
- Verify that your phone's Bluetooth and Wi-Fi are enabled.
- Restart the bulb by turning the power off and on.
- Check the Surplife App for any error messages or updates.

- **Cannot Connect to Wi-Fi:**

- Confirm you are using a 2.4GHz Wi-Fi network. These bulbs do not support 5GHz networks.
- Ensure your Wi-Fi password is entered correctly.
- Move the bulb closer to your Wi-Fi router during the setup process.
- If using a dual-band router, try temporarily disabling the 5GHz band during setup.

- **Voice Control Not Working:**

- Verify that the Surplife App is correctly linked to your Alexa or Google Assistant account.
- Ensure your voice assistant device is online and functioning correctly.
- Try rediscovering devices in your Alexa or Google Home app.
- Use the exact names you assigned to your bulbs in the Surplife App for voice commands.

Warranty and Support

For warranty information, technical support, or further assistance, please refer to the official luckystyle website or contact their customer service directly. Keep your purchase receipt for warranty claims.
