KingChii XJG-48C

KingChii 48L Electric Cigar Humidor with Temperature Control System (Model XJG-48C) - Instruction Manual

INTRODUCTION

Thank you for choosing the KingChii 48L Electric Cigar Humidor. This manual provides essential information for the proper setup, operation, and maintenance of your new cigar humidor. Please read these instructions carefully before use to ensure optimal performance and longevity of your unit. This humidor is designed to provide a stable and controlled environment for preserving your cigar collection.

PRODUCT OVERVIEW

The KingChii 48L Electric Cigar Humidor features advanced semiconductor electronic technology for precise temperature control, ensuring a stable environment for your cigars. Its 360° air circulation system maintains consistent temperature and humidity, while Spanish cedar wood shelves enhance the mellowing process and protect your collection.

- **Temperature Control:** Utilizes semiconductor electronic technology for a constant temperature range of 64-72°F (18-22°C) with low noise (≤ 40 dB).
- **Air Circulation & Frost-Free:** A 360° circulation system ensures even airflow, maintaining consistent temperature and humidity. Includes a built-in hygrometer for monitoring humidity levels (Accuracy: $\pm 5\%$ RH).
- **Natural Conservation Environment:** Equipped with high-quality Spanish cedar wood frames and drawers. The cedar wood oil emits a natural aroma, moisturizing and breathing, removing odors, and preventing drying or mold.
- **Hot Film Tempered Glass Door:** Features a double-layer mirror glass door that is heat-insulating, heat-resistant, wear-resistant, and easy to clean. The electronic touch screen offers fast response and easy operation.

SETUP

1. **Unpacking:** Carefully remove the humidor from its packaging. Retain all packaging materials for future transport or storage.
2. **Placement:** Place the humidor on a stable, level surface away from direct sunlight, heat sources, or excessive vibrations. Ensure adequate ventilation around the unit. It is suitable for placement in a bedroom, living room, or wine cellar.
3. **Power Connection:** Connect the power cord to a grounded 120 Volt electrical outlet.
4. **Initial Seasoning:** Before placing cigars, it is recommended to season the humidor. Wipe the interior cedar wood surfaces with a clean cloth dampened with distilled water. Allow the humidor to run for 24-48 hours with the door closed to stabilize internal conditions.
5. **Hygrometer Setup:** The humidor includes a built-in hygrometer. If it's a digital model requiring batteries, insert the watch battery into the back of the hygrometer unit.

OPERATING INSTRUCTIONS

1. **Power On/Off:** Press the power button on the electronic touch screen to turn the unit on or off.
2. **Temperature Adjustment:** Use the up and down arrow buttons on the touch screen to set your desired temperature within the 64-72°F range. The display will show the current internal temperature.
3. **Humidity Monitoring:** The built-in hygrometer displays the current humidity level inside the humidor. Aim for a humidity range of 60-80% for optimal cigar preservation.
4. **Internal LED Light:** The humidor features an internal LED light. Use the light button on the touch screen to illuminate the interior. This blue light is designed not to disturb your eyes, even at night.

MAINTENANCE

- **Cleaning:** Regularly wipe the exterior with a soft, dry cloth. For the interior, use a slightly damp cloth with distilled water. Avoid abrasive cleaners.
- **Hygrometer Maintenance:** If your digital hygrometer requires battery replacement, follow the instructions provided with the hygrometer. For analog hygrometers, occasional calibration may be necessary.
- **Water Reservoir:** The humidor may include a water reservoir for maintaining humidity. Fill it with distilled water as needed. Ensure it is placed correctly to avoid spills.
- **Spanish Cedar Care:** The Spanish cedar wood naturally helps regulate humidity and imparts a desirable aroma. Avoid using harsh chemicals on the cedar.

TROUBLESHOOTING

- **Temperature Not Holding:** Ensure the humidor is not placed near heat sources or in direct sunlight. Check that the door is properly sealed. Verify the set temperature is within the recommended range.
- **Humidity Too High/Low:** Adjust the amount of distilled water in the reservoir or use humidity control packs (e.g., Boveda packs) to achieve the desired humidity level (60-80%). Ensure the door seal is intact.
- **Unusual Odors:** The negative ion air purification system helps remove peculiar smells. Ensure the humidor is clean and properly seasoned.
- **Power Issues:** Verify the unit is properly plugged into a 120 Volt outlet. If in a region with different

voltage (e.g., UK 240V), ensure a suitable power adapter is used.

SPECIFICATIONS

Feature	Specification
Brand	KingChii
Model Name	XJG-48C
Capacity	48 Liters
Temperature Control Range	64-72°F (18-22°C)
Noise Level	≤40 dB
Voltage	120 Volts
Item Weight	42.9 pounds
Package Dimensions	26.3 x 25.6 x 21.3 inches
Special Features	Quiet Operation, 360° Air Circulation, Frost-Free, Electronic Touch Screen, Spanish Cedar Wood Shelves, Hot Film Tempered Glass Door

WARRANTY & SUPPORT

For warranty information and customer support, please refer to the documentation included with your purchase or contact KingChii customer service directly. Details regarding product registration, troubleshooting assistance, and warranty claims can typically be found on the manufacturer's official website or through your retailer.
