ML-Design Metal Bed Frame 90x200 cm User Manual

Model: ML-Design 90x200 Metal Bed Frame

1. INTRODUCTION

Thank you for choosing the ML-Design Metal Bed Frame 90x200 cm. This manual provides essential information for the safe assembly, proper use, and maintenance of your new bed frame. Please read these instructions carefully before assembly and retain them for future reference.

2. SAFETY INSTRUCTIONS

To ensure safe use of this product, please observe the following guidelines:

- Always assemble the bed frame on a soft, clean surface to prevent damage to components.
- Ensure all screws and fasteners are securely tightened before use. Periodically check and re-tighten as necessary.
- Do not exceed the maximum weight recommendation of **200 Kilograms**.
- Keep small parts and packaging materials away from children during assembly to prevent choking hazards.
- Do not stand or jump on the bed frame.
- Use only the mattress size specified (90 x 200 cm) to ensure proper fit and support.

3. PACKAGE CONTENTS

Before beginning assembly, verify that all components listed below are present and undamaged:

- 1x ML-Design Bed Frame (metal components and wooden panels)
- 1x Assembly Material (screws, bolts, tools)
- 1x Assembly Instructions
- Plastic Floor Protectors

4. SETUP AND ASSEMBLY

The ML-Design bed frame is designed for easy assembly. Follow these steps carefully:

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a soft, clean surface to avoid scratches.
2. **Identify Parts:** Refer to the included assembly diagram to identify each component (e.g., headboard, footboard, side rails, support legs, slatted base).
3. **Assemble Frame:** Attach the side rails to the headboard and footboard using the provided hardware. Ensure all connections are secure but do not fully tighten screws until the entire frame is assembled.
4. **Install Support Legs:** Attach any central support legs to the frame as indicated in the instructions. The bed has 6 legs in total for stability.
5. **Install Slatted Base:** Place the metal slatted base onto the frame. Secure it according to the instructions. The practical slats provide necessary stability and comfort.
6. **Final Tightening:** Once all components are in place, fully tighten all screws and bolts.
7. **Attach Floor Protectors:** Apply the plastic floor protectors to the bottom of each leg to prevent scratching your floor.

The anti-noise plastic plug design minimizes noise, ensuring a quiet and comfortable night's sleep.

5. USAGE AND OPERATION

Your ML-Design Metal Bed Frame is designed to provide a comfortable and stable sleeping surface. Here's how to use it effectively:

- **Mattress Placement:** Place your 90 x 200 cm mattress directly onto the robust steel slatted base. The design supports various mattress types, including foam and spring mattresses.
- **Headboard Comfort:** The higher headboard provides a comfortable backrest for reading or relaxing in bed.
- **Under-Bed Storage:** The 27 cm ground clearance offers ample space for storage baskets, shoe boxes, or other items, optimizing room space.
- **Weight Capacity:** Ensure the total weight on the bed (including mattress and occupants) does not exceed **200 Kilograms**.

6. MAINTENANCE

Proper care will extend the life and appearance of your bed frame:

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the powder coating. The wooden headboard and footboard panels are waterproof and scratch-resistant, allowing for easy cleaning with a damp cloth.
- **Regular Checks:** Periodically inspect all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability.
- **Avoid Moisture:** While the wooden panels are water-resistant, prolonged exposure to excessive moisture should be avoided.

7. TROUBLESHOOTING

If you encounter any issues, refer to the following common solutions:

- **Squeaking Noises:**
 - Check all bolts and screws for tightness. Loose connections are a common cause of squeaking.
 - Ensure the plastic floor protectors are correctly installed and not causing friction.

- **Instability/Wobbling:**
 - Verify that all support legs are firmly on the ground and evenly distributed.
 - Re-tighten all assembly hardware.
 - Ensure the bed is on a flat, level surface.
- **Missing Parts:**
 - Double-check all packaging materials. Small parts can sometimes be overlooked.
 - Contact customer support if parts are genuinely missing.
