

BoxWave MagnetoSnap PD Angle Adapter

BoxWave MagnetoSnap PD Angle Adapter User Manual

Model: MagnetoSnap PD Angle Adapter

INTRODUCTION

The BoxWave MagnetoSnap PD Angle Adapter is designed to enhance your USB Type-C charging experience, particularly for devices like the Flipper Zero. This magnetic adapter provides a convenient and secure connection, supporting up to 100W Power Delivery and featuring a 90-degree angled design for optimized cable management. It also helps preserve your device's charging port by reducing wear from constant plugging and unplugging.

SETUP INSTRUCTIONS

1. **Insert the Magnetic Tip:** Carefully plug the small magnetic tip of the adapter into the USB Type-C charging port of your device (e.g., Flipper Zero). This tip is designed to remain in your device to protect the port.
2. **Connect the Adapter Body:** Plug the main body of the MagnetoSnap PD Angle Adapter into your existing USB Type-C charging cable.
3. **Initiate Charging:** When you need to charge your device, simply bring the adapter body (connected to your charging cable) close to the magnetic tip inserted in your device. The magnetic connection will snap into place, and charging will begin.

OPERATING INSTRUCTIONS

The MagnetoSnap PD Angle Adapter is designed for straightforward use:

- **Magnetic Connection:** The primary function is the magnetic attachment. Once the magnetic tip is in your device, the cable-connected adapter body will easily snap into place, providing a secure charging connection.
- **Power Delivery:** This adapter supports up to 100W of power delivery, allowing for efficient charging of compatible devices, from small gadgets to more power-hungry electronics.
- **90-Degree Angle:** The thoughtful 90-degree right-angle design helps optimize your desktop or workspace by routing the charging cable neatly, preventing bends and strain on the cable and port.

Parameter

Material : Zinc alloy + TPE

Power : 100W/5A

Transmission speed: 480Mbps

MAINTENANCE

To ensure the longevity and optimal performance of your MagnetoSnap PD Angle Adapter, consider the following:

- **Port Preservation:** The magnetic tip is designed to remain in your device's charging port. This significantly reduces wear and tear that occurs from repeatedly plugging and unplugging cables, thereby preserving the device's port.
- **Cleaning:** Keep the magnetic contact surfaces clean and free of dust or debris. Use a soft, dry cloth to gently wipe the surfaces if needed. Avoid using liquids or abrasive materials.
- **Material Durability:** The adapter is constructed from high-quality aluminum alloy and TPE materials, providing durability. However, avoid excessive force or bending, which could damage the internal components.

TROUBLESHOOTING

If you encounter issues with your MagnetoSnap PD Angle Adapter, try the following steps:

- **No Charging:**
 - Ensure the magnetic connection is secure and fully snapped into place.
 - Verify that your charging cable and power adapter are functioning correctly with other devices.
 - Check if the magnetic tip in your device's port is clean and free of obstructions.
- **Intermittent Connection:**
 - Clean the magnetic contact points on both the tip and the adapter body.
 - Ensure there is no physical damage to the adapter or the magnetic tip.
- **Slow Charging:**
 - Confirm that your power adapter and cable support the required power delivery (e.g., 100W for fast charging).
 - Ensure your device itself supports fast charging.

If problems persist, refer to the support information section.

SPECIFICATIONS

Product Specifications	
Feature	Detail
Model Name	MagnetoSnap PD Angle Adapter
Power Delivery	Up to 100W / 5A
Connectivity	USB Type-C (Magnetic)
Data Transmission Speed	480Mbps
Material	Zinc Alloy + TPE, 24K Gold-plated contacts
Design	90-Degree Right Angle
Item Weight	2.4 ounces
ASIN	B0CXRPTS57
