5. TROUBLESHOOTING

If you encounter any issues with your Yaheetech Rattan Cat Tree, please refer to the following common solutions:

Problem	Possible Cause	Solution
Tree feels wobbly.	Loose connections or not properly anchored.	Tighten all assembly bolts. Ensure the tree is anchored to a wall using the provided hardware.
Cat not using scratching posts.	Preference for other surfaces or unfamiliarity.	Encourage use by sprinkling catnip on the posts or gently guiding your cat's paws. Place the tree in a prominent area.

Problem	Possible Cause	Solution
Cat avoids clear bowl bed.	Discomfort with transparency or enclosed space.	Try placing a favorite blanket or toy inside. If still unused, the bowl can be removed to create an open platform.
Cushions flatten over time.	Normal wear and tear.	Fluff cushions regularly. Consider replacing them if they lose their loft significantly.
