ASSEMBLY INSTRUCTIONS

Follow these steps carefully. All parts and hardware are numbered for easy identification. It is recommended to assemble with two people for easier handling.

1. **Prepare Components:** Unpack all components and lay them out on a soft, clean surface. Identify each part using the provided numbering.
2. **Assemble the Base Frame:** Connect the side panels and bottom panel of the main storage box using the designated screws. Ensure all connections are snug but do not overtighten.
3. **Attach the Metal Legs:** Securely attach the four V-shaped metal legs to the bottom of the assembled base frame using the provided hardware. Ensure they are oriented correctly for stability.
4. **Install the Lift Mechanism:** Attach the metal lift hinges to the inside of the storage box and to the underside of the tabletop. Pay close attention to the orientation of the hinges as shown in the diagram. Ensure springs are correctly engaged.
5. **Attach the Tabletop:** Carefully align the tabletop with the lift mechanism and secure it. Test the lift function gently to ensure smooth operation.

- **Scratch Prevention:** While the surface is scratch-resistant, use coasters for drinks and placemats for hot dishes to prevent potential damage.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten if necessary.
- **Movement:** When moving the table, lift it rather than dragging to prevent damage to the legs and floor.

TROUBLESHOOTING

If you encounter any issues with your WOLTU coffee table, refer to the common problems and solutions below.

Problem	Possible Cause	Solution
Tabletop is difficult to lift or lower.	Mechanism not properly aligned or lubricated; excessive weight on top.	Ensure no objects are obstructing the mechanism. Check if all screws on the lift mechanism are tightened. Apply a small amount of silicone lubricant to moving parts if needed. Reduce weight on the tabletop.
Table feels wobbly or unstable.	Loose screws or uneven floor.	Check and tighten all assembly screws, especially those connecting the legs to the frame. Ensure the table is placed on a flat, even surface. Adjust leg levelers if applicable (not explicitly mentioned, but common for furniture).
Scratches or marks on the surface.	Sharp objects; lack of protective measures.	Use coasters and placemats. For minor scratches, furniture repair kits may be used.
Hidden storage compartment does not close flush.	Items inside are too tall; mechanism obstruction.	Ensure no items in the storage compartment are preventing the lid from closing completely. Check for any debris or obstruction in the hinge area.
