VRURC T2066

VRURC Portable Power Bank User Manual

Model: T2066

INTRODUCTION

This manual provides essential information for the safe and efficient operation of your VRURC Portable Power Bank. Please read this manual thoroughly before using the product and retain it for future reference.

KEY FEATURES

- **4 Built-in Cables:** Includes 3 output cables (Lightning, USB-C, Micro USB) and 1 fast-charging input USB-A cable for versatile device compatibility.
- **Fast Charging:** Supports QC22.5W and PD20W for rapid charging of compatible devices.

- **20000mAh Capacity:** High-density lithium polymer battery provides multiple charges for smartphones, tablets, and other small electronic devices.
- **LED Display:** Smart LED display indicates the remaining power level.
- **Multiple Recharging Options:** Can be recharged via built-in USB-C cable (18W), USB-C Input (QC/PD 3.0) at 18W, or built-in USB-A cable (10W).
- **Airline-Approved Safety:** Equipped with intelligent safeguards against overcharge, overvoltage, overcurrent, short-circuits, and overtemperature.

SETUP

First Use & Charging the Power Bank

Before initial use, it is recommended to fully charge your VRURC Portable Power Bank. There are three methods to recharge the power bank:

1. **Using the Built-in USB-C Cable (18W):** Connect the built-in USB-C cable to a compatible USB-C wall adapter (not included). This method takes approximately 5.5 hours for a full charge.
2. **Using the USB-C Input Port (QC/PD 3.0, 18W):** Connect a USB-C to USB-C cable (not included) from a compatible QC/PD 3.0 wall adapter to the power bank's USB-C input port. This method also takes approximately 5.5 hours for a full charge.
3. **Using the Built-in USB-A Cable (10W):** Connect the built-in USB-A cable to a standard USB-A wall adapter (not included). This method takes approximately 7.5 hours for a full charge.

The LED display will show the charging progress and indicate "100%" when fully charged.

3 Recharging Way

OPERATING INSTRUCTIONS

Charging Your Devices

The VRURC Portable Power Bank is designed to charge a wide range of devices using its integrated cables and additional ports.

1. **Identify the Correct Cable/Port:**

- For iPhone (15/14/13/12 series etc.): Use the built-in Lightning cable or a USB-C to Lightning cable with the USB-C output port.
- For Samsung, Google, LG, and other USB-C Android phones: Use the built-in USB-C cable or a USB-C to USB-C cable with the USB-C output port.
- For Micro USB devices: Use the built-in Micro USB cable.
- For other devices requiring a standard USB-A connection: Use the USB-A output port with your device's charging cable.

2. **Connect Your Device:** Plug the appropriate built-in cable or your device's charging cable into the power bank's output port and then into your device.

3. **Automatic Charging:** The power bank will automatically begin charging your device. The LED display will show the remaining battery percentage of the power bank.

4. **Charging Multiple Devices:** The power bank can charge up to 4 devices simultaneously using its various outputs. Note that charging multiple devices may affect the charging speed for each individual device.

Checking Battery Level

The integrated LED display shows the current battery percentage of the power bank. Simply press the power button (if available, or it activates automatically upon connection) to view the remaining charge.

MAINTENANCE

- Keep the power bank away from extreme temperatures (hot or cold), direct sunlight, and humid environments.
- Do not expose the power bank to water or other liquids.
- Clean the power bank with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- Store the power bank in a cool, dry place when not in use. For long-term storage, charge it to about 50% every 3 months to preserve battery life.
- Avoid dropping or subjecting the power bank to strong impacts.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Power bank not charging devices.	Low battery on power bank; incorrect cable/port; device not compatible.	Recharge the power bank; ensure correct cable/port is used; check device compatibility.
Power bank not recharging.	Faulty charging cable/adaptor; power bank is already full; port issue.	Try a different charging cable and wall adapter; check LED display for full charge; ensure ports are clean and undamaged.
Slow charging.	Using a low-power adapter; charging multiple devices; cable issue.	Use a QC/PD compatible wall adapter (18W or higher); charge fewer devices simultaneously; try a different cable.
LED display not working.	Power bank is off; internal malfunction.	Connect a device or charger to activate; if problem persists, contact customer support.

SPECIFICATIONS

Feature	Detail
Model Number	T2066

Feature	Detail
Battery Capacity	20000mAh
Input (USB-C)	QC/PD 3.0, 18W
Output (Built-in Cables)	USB-C, Lightning, Micro USB (up to 22.5W/20W)
Output (USB-A Port)	22.5W Max
Dimensions	9.5 x 8.9 x 2.62 cm (3.74 x 3.5 x 1.03 inches)
Weight	300 g (10.58 oz)
Battery Type	Lithium Polymer
Color	Pink
