qirita PA02

qirita Magnetic Car Face Tracking Tripod User Manual

Model: PA02 | Brand: qirita

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your qirita Magnetic Car Face Tracking Tripod (Model PA02). This smart phone holder is designed to automatically detect and track faces or bodies, offering 360° continuous rotation for hands-free video recording, vlogging, and live streaming. It features both magnetic and clip phone holding options, gesture control, and a detachable remote control for enhanced convenience.

WHAT'S INCLUDED

- Automatic Face Tracking Tripod
- Magnetic Ring
- Remote Control
- Type-C Charging Cable
- User Manual (this document)

SETUP GUIDE

1. Charging the Device

Before first use, fully charge the tripod using the provided Type-C charging cable. Connect the cable to the charging port on the device and a suitable USB power source. The charging indicator light will show the charging status.

2. Attaching Your Smartphone

The qirita tripod offers two methods for attaching your smartphone:

- 1. Magnetic Connection:** For phones with built-in magnetic capabilities (e.g., iPhone 12 series and newer) or those using a magnetic phone case, simply align the phone with the magnetic ring on the tripod head until it securely attaches.
- 2. Phone Clip Connection:** For other smartphones (2.5-3.7 inches wide), use the adjustable phone clip. Gently pull open the clip and insert your phone, ensuring it is held firmly.

Detachable Magnetic & Phone Clip

Magnetic Connection

Phone Clip Connection

Illustration of the two phone attachment options: magnetic connection for compatible phones and the adjustable phone clip for wider compatibility.

3. Remote Control Pairing

The included remote control connects to your phone via Bluetooth.

1. Ensure the remote control is charged and powered on.
2. Enable Bluetooth on your smartphone.
3. Search for "QIRITA" in your phone's Bluetooth settings and pair with the device.
4. Once paired, the remote can be used to start or stop recording on your phone.

Auto Tracking Mode & Wireless Remote

Automatically track your face or body wherever you go

The qirita tripod in action, demonstrating its auto-tracking mode and the use of the wireless remote control.

4. Adjusting the Expandable Pole

The tripod features a hidden expandable pole. Gently pull upwards on the phone holder assembly to extend the pole, providing additional height for various shooting angles. Push down to retract.

Expandable pole

Hidden design poles for more shooting ideas

Visual guide on extending the hidden pole of the qirita tripod for increased height and shooting flexibility.

5. Tripod Mounting (Optional)

The base of the qirita tripod features a standard 1/4-inch screw interface, allowing it to be mounted on other compatible tripods for increased stability or height.

Widely Compatible

1/4 thread can be used with a tripod

OPERATING INSTRUCTIONS

1. Powering On/Off

Press and hold the power button on the main unit to turn the device on or off. An indicator light will confirm the power status.

2. Smart Face/Body Tracking

The tripod uses an AI computing system to automatically detect and track your face or body. It rotates 360° continuously to keep you in frame.

- **Horizontal Tracking:** Ideal for movements across the frame.
- **Vertical Tracking:** Suitable for movements up and down.

The device will automatically adjust its rotation to follow your movement, ensuring you remain centered in the video.

3. Gesture Control

Control tracking with simple hand gestures:

- **"OK" Gesture ():** Make an "OK" sign with your hand to initiate face/body tracking.
- **Open Palm Gesture ():** Show an open palm to pause the tracking function.

Visual representation of the gesture controls: the "OK" gesture to begin tracking and the open palm gesture to pause tracking.

4. Manual and Automatic 360° Rotation

In addition to automatic tracking, the device offers rotation control:

- **Manual Adjustment:** The phone clip and neck design allow for 360° rotation and 180° tilt, enabling horizontal or vertical camera modes and various angles.
- **Automatic Cycle Rotation:** Press the designated cycle button on the device to trigger a continuous 360° rotation,

useful for panoramic shots or hands-free recording without tracking a specific subject.

Demonstration of the tripod's multi-angle rotation, allowing for 360-degree horizontal rotation and 180-degree vertical adjustment of the phone holder.

5. No App Required

The qirita tripod operates independently without the need for any dedicated application. This ensures broad compatibility with various smartphones and platforms, including Instagram, YouTube, Facebook, and TikTok.

No App Required

Stream Hands-Free on INS, YouTube, FB, TikTok & More

Note : Microphone accessories not included

The qirita tripod's key feature: no app required for operation, making it universally compatible with popular streaming and social media platforms.

MAINTENANCE

- Keep the device clean by wiping it with a soft, dry cloth.
- Avoid exposing the device to extreme temperatures, moisture, or direct sunlight.
- Do not disassemble the device, as this will void the warranty and may cause damage.
- Store in a cool, dry place when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Device does not power on.	Low battery.	Charge the device using the provided Type-C cable.
Tracking is not working.	Incorrect gesture or subject out of range/view.	Ensure proper lighting and that the subject is within the optimal tracking distance (best within 3 meters). Use the correct "OK" gesture to initiate tracking.
Remote control not connecting.	Remote not paired or low battery.	Ensure remote is powered on and charged. Re-pair the remote via your phone's Bluetooth settings.
Phone not holding securely.	Incorrect attachment method or phone size.	Ensure magnetic connection is strong or phone clip is fully extended and gripping the phone (2.5-3.7 inches width).
