Yaheetech B0CXY1WDWV

Yaheetech 10-in-1 Inflatable Bounce House User Manual

Model: B0CXY1WDWV

1. SETUP INSTRUCTIONS

Follow these steps to properly set up your Yaheetech 10-in-1 Inflatable Bounce House:

- Site Preparation:** Choose a flat, clear area in your backyard, free from sharp objects, debris, or overhead obstructions. Lay out the included tarp or a protective ground cover.
- Unroll and Position:** Unroll the inflatable bounce house completely on the prepared surface. Ensure the air intake tube is straight and accessible for the blower.
- Connect Blower:** Attach the 650W ETL-certified air blower to the inflatable's air intake tube. Secure it tightly with the provided strap. Plug the blower into a grounded electrical outlet.
- Inflate:** Turn on the blower. The bounce house will inflate rapidly, typically within 2 minutes. Ensure all sections are fully inflated and firm.
- Anchor Securely:** Use the included ground anchors to firmly secure the bounce house to the ground at all designated anchor points. This prevents movement during use.
- Water Connection (for wet use):** Connect a standard garden hose to the water hose kit provided. Attach the water hose kit to the designated water spray nozzles on the inflatable, ensuring a secure fit to prevent leaks.

2. OPERATING INSTRUCTIONS

The Yaheetech 10-in-1 Inflatable Bounce House offers multiple play features for endless fun:

- **Bounce Area:** A spacious 76" L × 58.7" W bouncing area secured with mesh walls for safe play.
- **Long Slide:** A 9.4" long slide for an enjoyable and thrilling experience, leading into the splash pool.
- **Climbing Wall:** Encourages physical activity and exercise, leading up to the slide.
- **Small Tunnel:** A fun tunnel for crawling and imaginative play.
- **Large Splash Pool:** A generous pool area for splashing and cooling off.
- **Water Cannons:** Two water cannons add interactive fun; aim and spray for refreshing play.
- **Dartboard:** Features a dartboard with 6 hook & loop balls for target practice.
- **Basketball Hoop:** Includes a basketball hoop for shooting practice.
- **Soccer Goal:** A soccer goal with an included soccer ball for active play.
- **Ring Toss Game:** Two ring toss poles with 6 plastic rings for a classic game.

Safety Guidelines:

- Suitable for children aged 3 to 10 years.
- Maximum weight capacity per child: 99 lbs.
- Recommended for up to 4 children at a time.
- Always supervise children during play.
- Ensure the blower remains continuously inflated during use.
- Do not allow children to wear shoes, glasses, or sharp objects while playing.
- Keep the area around the inflatable clear of obstacles.

JOYFUL OUTDOOR FUN TIME

3. MAINTENANCE

Proper maintenance ensures the longevity and safety of your inflatable bounce house:

- **Cleaning:** After each use, especially when used with water, clean the surface with mild soap and water. Rinse thoroughly to remove any residue.
- **Drying:** It is crucial to dry the inflatable completely before storage to prevent mold and mildew. Turn off the water, allow the unit to air dry in a sunny spot, or run the blower for 1-2 hours without water to ensure all moisture is gone.
- **Storage:** Once completely dry, turn off the blower and allow the inflatable to deflate. Fold the fabric neatly, paying attention to the placement of the air inlet. Store it in the provided storage bag in a cool, dry place away from direct sunlight and extreme temperatures.
- **Material Care:** The bounce house is crafted from tough 420D PVC-coated polyester fabric, with durable 840D fabric and double to triple-stitched seams in high-stress areas. Avoid dragging the inflatable over rough surfaces.
- **Repair Kit:** Use the included repair patch kit for any minor punctures or tears.

4. TROUBLESHOOTING

If you encounter any issues with your inflatable bounce house, refer to the following common solutions:

- **Inflatable Not Fully Inflating:**
 - Check if the blower is securely attached to the air intake tube and fully plugged into a working outlet.
 - Ensure there are no large tears or open zippers on the inflatable that would cause air leakage.
 - Verify the blower's wattage (650W) is sufficient for the unit.
- **Water Not Spraying Properly:**
 - Check the water hose connection for kinks or blockages.
 - Ensure the water source is turned on and has adequate pressure.
 - Clean any potential clogs in the spray nozzles.
- **Excessive Water Accumulation in Pool:**

- Ensure the drain plugs are open when you want to drain the water.
- Adjust water flow to prevent overfilling.

- **Inflatable Losing Air Slowly:**

- Inspect the entire surface for small punctures. Use the repair kit to patch any holes.
- Ensure all seams and zippers are properly closed.

5. SPECIFICATIONS

Feature	Detail
Product Dimensions	220.47 x 154.72 x 96.06 inches (18.4' L x 13' W x 8' H)
Item Weight	58.6 pounds
Material	420D PVC-coated polyester fabric (840D in high-stress areas)
Blower Wattage	650W ETL-certified
Blower Cord Length	12.5 feet
