## OPERATING THE DRESSER

The Atticus dresser features six spacious drawers designed for smooth operation. To open a drawer, gently pull the top edge of the drawer front. To close, push the drawer firmly until it is fully seated within the frame. The drawers are equipped with stops to prevent them from being pulled out completely, enhancing safety. Note that these stops may limit the drawer's extension to approximately halfway. This is a design feature to prevent accidental drawer removal and tipping.

## CARE AND MAINTENANCE

To maintain the appearance and longevity of your dresser, follow these care instructions:

- **Cleaning:** Wipe the surface with a dry, soft cloth. Avoid using abrasive cleaners, harsh chemicals, or polishes that may damage the wood finish.
- **Spills:** Immediately blot any spills with a clean, dry cloth.
- **Sunlight:** Avoid prolonged exposure to direct sunlight to prevent fading or discoloration.
- **Heat and Moisture:** Keep the dresser away from direct heat sources and areas of high humidity. Use coasters under beverages to protect the surface.
- **Hardware:** Periodically check and tighten all hardware to ensure stability.

## TROUBLESHOOTING

If you encounter issues with your dresser, refer to the following common solutions:

- **Missing or Damaged Parts:** If any components were missing or damaged upon delivery, do not proceed with assembly. Contact Walker Edison customer support immediately for replacement parts.
- **Assembly Difficulty:** Ensure you are following the assembly manual step-by-step. Double-check that all hardware is correctly oriented and tightened. If a step is unclear, refer to the diagrams in the manual or contact customer support for clarification.
- **Drawers Not Sliding Smoothly:** Verify that the drawer glides are installed correctly and are free of obstructions. Ensure all screws on the glides are tightened. If the issue persists, check the alignment of the drawer box within the frame.
- **Dresser Wobbles:** Ensure the dresser is placed on a level surface. Adjust the leveling feet (if present) or place shims under the legs as needed. Confirm that all assembly hardware is securely tightened. Re-install the anti-tip kit if it has become loose.
