CORBOBO Hi75

CORBOBO x LEOBOG Hi75 Mechanical Gaming Keyboard User Manual

Model: Hi75

1. INTRODUCTION

The CORBOBO x LEOBOG Hi75 is a high-performance 75% layout mechanical gaming keyboard designed for both gaming and office use. It features a durable aluminum alloy base, hot-swappable pre-lubed linear switches, and customizable RGB backlighting. This manual provides detailed instructions to help you get the most out of your new keyboard.

2.2 Connecting Your Keyboard

The LEOBOG Hi75 keyboard connects via a USB-Type C wired connection. It is compatible with various operating systems including Android, Windows, and Mac.

1. Locate the USB-Type C port on the back of the keyboard.
2. Connect one end of the provided USB-Type C cable to the keyboard.
3. Connect the other end of the USB cable to an available USB port on your computer or laptop.

4. The keyboard will automatically be recognized by your system and the RGB backlighting will illuminate.

3.2 Multi-function Knob

The knob located on the top right of the keyboard serves dual functions:

- **Rotate:** Adjusts volume (turn up/down) or keyboard brightness.
- **Long Press:** Switches between volume adjustment mode and brightness adjustment mode.

3.3 RGB Backlighting

The Hi75 keyboard features 16.8 million RGB lights with over 17 preset backlight effects and 10 RGB music rhythm modes. The backlight effects can also be customized via dedicated driver software.

- **Changing Effects:** Use FN + TAB to cycle through different lighting effects.
- **Changing Colors:** Use FN + Q/W/E/R to change the color of the backlight.
- **Brightness Adjustment:** Use the multi-function knob or FN + U/I/O to adjust brightness.

4. MAINTENANCE

4.1 Cleaning Your Keyboard

To ensure longevity and optimal performance, regular cleaning is recommended:

- Disconnect the keyboard from your computer before cleaning.
- Use a soft, lint-free cloth dampened with a small amount of water or a mild cleaning solution to wipe down the keycaps and keyboard surface.
- For deeper cleaning, use the provided keycap puller to remove keycaps and clean underneath with compressed air or a small brush.
- Ensure the keyboard is completely dry before reconnecting it.

4.2 Switch Replacement

Thanks to the hot-swappable design, replacing switches is straightforward:

1. Carefully remove the keycap of the switch you wish to replace using the keycap puller.
2. Use a switch puller (not included, but often comes with replacement switches) to gently pull the switch straight up from the PCB.
3. Align the pins of the new switch with the holes on the PCB and press firmly until it clicks into place. Ensure pins are not bent.
4. Replace the keycap.

5. TROUBLESHOOTING

5.1 Keyboard Not Responding

- Ensure the USB-Type C cable is securely connected to both the keyboard and the computer.
- Try connecting the keyboard to a different USB port on your computer.
- Test the keyboard on another computer to rule out system-specific issues.
- Restart your computer.

5.2 RGB Lights Not Working Correctly

- Check the brightness level using the multi-function knob or FN key combinations.
- Cycle through different lighting modes using FN + TAB to see if the issue persists across all modes.
- Ensure the keyboard's driver software (if installed) is up to date.
- Perform a factory reset if available (refer to the included user manual for specific key combinations for factory reset).

6. SPECIFICATIONS

Feature	Detail
