

Zoom MS-70CDR+

Zoom MS-70CDR+ MultiStomp Pedal User Manual

Model: MS-70CDR+

1. INTRODUCTION

The Zoom MS-70CDR+ MultiStomp Chorus/Delay/Reverb Pedal is a versatile effects unit designed for guitarists and other musicians. It offers a wide array of chorus, delay, and reverb effects, along with other modulation and spatial effects. This pedal features 24-bit A/D/A conversion and 32-bit signal processing for high-quality audio. Users can chain up to 6 effects simultaneously and store up to 100 user patches. Its compact and durable design makes it suitable for both studio and live performance environments.

Image Description: A front view of the blue Zoom MS-70CDR+ MultiStomp pedal, showcasing its LCD screen, control knobs, and footswitches. The screen displays 'HD HALL REVERB'.

2. SETUP

2.1 Powering the Unit

The MS-70CDR+ can be powered by two AA batteries or an optional AC adapter (Zoom AD-16 recommended). Ensure batteries are inserted correctly, observing polarity, or connect the AC adapter to the DC 9V input on the rear of the unit. The unit is battery powered by default.

Image Description: An underside view of the Zoom MS-70CDR+ pedal with the battery compartment cover removed, showing the two AA battery slots.

Image Description: A rear view of the Zoom MS-70CDR+ pedal, highlighting the DC 9V power input (labeled 'USE AD-16 ONLY') and a DC 5V USB Type-C port for connectivity.

2.2 Connecting Instruments

Connect your instrument (e.g., guitar) to the input jack(s) on the side of the pedal. For mono operation, use the 'L/MONO' input. For stereo input, use both 'L' and 'R' inputs. Connect the output jack(s) to your amplifier or audio interface. The pedal supports stereo output.

Image Description: A side view of the Zoom MS-70CDR+ pedal, showing the two mono/stereo input jacks.

Image Description: A top-down view of the Zoom MS-70CDR+ pedal with instrument cables connected to its input and output jacks, demonstrating a typical setup.

3. OPERATING THE PEDAL

3.1 Basic Controls

The MS-70CDR+ features a clear 160x128 dot-matrix LCD for navigation. Four control knobs (PUSH ADD, DELETE, LIBRARY, MENU) and four directional footswitches (MEMORY UP/DOWN, SCROLL UP/DOWN) allow for intuitive operation. The central footswitch also functions as a tuner when held down.

Image Description: An angled view of the Zoom MS-70CDR+ pedal, highlighting the LCD screen and the layout of the control knobs and footswitches.

3.2 Navigating Effects and Patches

Use the MEMORY footswitches to cycle through the 100 user patch memories. The SCROLL footswitches allow for parameter adjustment within an effect or navigating menus. The control knobs above the footswitches are used for fine-tuning effect parameters and menu selections.

Image Description: A person's hand holding the Zoom MS-70CDR+ pedal, demonstrating how the control knobs are

used to adjust settings on the screen.

3.3 Effect Chaining

The MS-70CDR+ allows for chaining up to 6 effects simultaneously. This enables complex soundscapes and custom effect combinations. Effects can be arranged in any order within a patch. The pedal offers over 140 effects, including various choruses, delays, and reverbs, as well as other modulation and dynamic effects.

Image Description: A graphical representation illustrating how various effects (e.g., Dirty Gate, Sky Filter, Vintage Chorus, Loop Roll, HD Hall Reverb, Analog Delay) can be chained and managed by the Zoom MS-70CDR+ pedal.

3.4 Tuner Function

To activate the built-in tuner, press and hold the central footswitch. The display will show the tuning interface, allowing for precise instrument tuning. Press the footswitch again to exit tuner mode.

Image Description: A close-up view of the Zoom MS-70CDR+ pedal placed on a pedalboard, with a hand pressing the central footswitch, indicating activation of a function like the tuner.

4. MAINTENANCE

To ensure the longevity and optimal performance of your MS-70CDR+ pedal, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the pedal's exterior. Avoid abrasive cleaners or solvents.
- **Storage:** Store the pedal in a cool, dry place away from direct sunlight and extreme temperatures. If storing for an extended period, remove the batteries to prevent leakage.
- **Connectivity:** Periodically check all input/output jacks and cables for secure connections and signs of wear.

5. TROUBLESHOOTING

If you encounter issues with your MS-70CDR+ pedal, refer to the following common troubleshooting steps:

- **No Power:**
 - Ensure batteries are fresh and correctly inserted, or that the AC adapter is securely connected and functioning.
 - Verify the power source (outlet or battery) is active.
- **No Sound Output:**
 - Check all cable connections between the instrument, pedal, and amplifier.
 - Ensure the amplifier's volume is turned up and it is powered on.
 - Verify that the pedal is not in tuner mode or bypass mode if an effect is desired.
 - Check the patch settings to ensure effect levels are not set to zero.
- **Distorted or Poor Sound Quality:**
 - Adjust input and output levels on the pedal and connected devices to avoid clipping.
 - Check for faulty cables or connections.
 - Ensure the correct effect type and parameters are selected for your desired sound.
- **Controls Unresponsive:**
 - Try restarting the unit by disconnecting and reconnecting power.
 - If issues persist, consult the official Zoom support resources.

6. SPECIFICATIONS

Feature	Specification
Model Number	MS-70CDR+
Dimensions (L x W x H)	5.24" x 3.11" x 2.4" (13.3 cm x 7.9 cm x 6.1 cm)
Item Weight	0.91 Pounds (14.6 ounces)

Body Material	Metal
Color	Blue
Power Source	Battery Powered (2x AA) or optional AC Adapter (DC 9V)
Signal Format	Analog
Hardware Interface	USB
Connector Type	USB Type-C

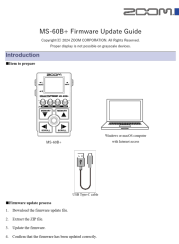

7. WARRANTY AND SUPPORT

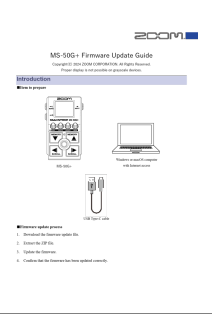

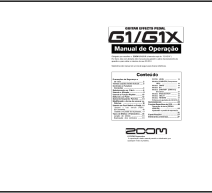

For information regarding warranty coverage, technical support, or service, please refer to the official Zoom website or contact Zoom customer service directly. Keep your proof of purchase for warranty claims.
