Nolan M951 X

NOLAN M951 X User Manual

HELMET COMMUNICATION SYSTEM

1. Introduction

The NOLAN M951 X is an advanced helmet communication system designed for seamless integration with compatible Nolan helmets. It provides high-quality audio for communication, music, and navigation, ensuring a comfortable and connected riding experience. This manual provides essential information for the proper installation, operation, maintenance, and troubleshooting of your M951 X system.

2. Package Contents and Overview

Before proceeding with installation, verify that all components are present in the package. The M951 X system typically includes the main control unit, speakers, microphone, and necessary mounting hardware.

Figure 1: NOLAN M951 X Helmet Communication System in its packaging, showing the main unit and branding.

3. Setup and Installation

The M951 X system is designed for easy integration into compatible Nolan helmets. Follow these general steps for installation:

- 1. Prepare the Helmet:** Carefully remove the helmet's inner padding and cheek pads as per your helmet's specific instructions to access the speaker pockets and cable routing channels.
- 2. Install Speakers:** Place the speakers into the designated speaker pockets within the helmet. Ensure they are positioned comfortably over your ears.
- 3. Mount Microphone:** Attach the microphone to the helmet's chin bar or cheek pad area, ensuring it is close to your mouth for clear audio pickup. Route the microphone cable discreetly.
- 4. Install Main Unit:** Secure the main control unit to the exterior of the helmet using the provided mounting bracket. Ensure it is firmly attached and accessible for operation.
- 5. Connect Cables:** Connect the speaker and microphone cables to the main control unit. Route all cables neatly within the helmet's interior to prevent interference or discomfort.
- 6. Reassemble Helmet:** Carefully reinsert the helmet's inner padding and cheek pads, ensuring no cables are pinched or exposed.

For detailed, helmet-specific installation instructions, refer to the supplementary guide provided with your Nolan helmet or visit the official Nolan website.

4. Operating Instructions

The M951 X features intuitive controls for easy operation while riding. Familiarize yourself with the control unit buttons:

Figure 2: Close-up view of the NOLAN M951 X control unit, showing its buttons for operation.

- **Power On/Off:** Press and hold the main 'ON' button for approximately 3 seconds to power the unit on or off.
- **Volume Control:** Use the '+' and '-' buttons to adjust the audio volume.
- **Bluetooth Pairing:** In power-off state, press and hold the 'ON' button until the indicator light flashes rapidly to enter pairing mode. Search for "NOLAN M951 X" on your device's Bluetooth settings.
- **Intercom Function:** Press the 'Intercom' button (if available, or a specific combination) to initiate or end

intercom communication with other paired Nolan systems.

- **Music Playback:** Once paired with a smartphone, music can be controlled via the unit's buttons (play/pause, skip track) or directly from your phone.
- **Phone Calls:** Answer or end calls by pressing the main 'ON' button when a call comes in.

5. Maintenance and Care

Proper maintenance ensures the longevity and optimal performance of your M951 X system:

- **Cleaning:** Use a soft, damp cloth to clean the exterior of the control unit. Do not use abrasive cleaners or solvents. Ensure all ports are dry before use.
- **Battery Care:** For optimal battery life, avoid fully discharging the unit frequently. Charge the unit regularly, especially if it will be stored for an extended period. Store in a cool, dry place.
- **Storage:** When not in use, store the helmet with the M951 X system in a dry environment, away from direct sunlight and extreme temperatures.
- **Firmware Updates:** Check the official Nolan website periodically for firmware updates that may improve performance or add new features.

6. Troubleshooting

If you encounter issues with your M951 X system, try the following solutions:

Problem	Possible Cause	Solution
Unit does not power on.	Low battery; unit not charged.	Charge the unit fully using the provided USB cable.
No audio from speakers.	Speakers disconnected; volume too low; incorrect pairing.	Check speaker connections; increase volume; re-pair with your device.
Cannot pair with device.	Unit not in pairing mode; device Bluetooth off; interference.	Ensure unit is in pairing mode; enable Bluetooth on device; move away from other wireless devices.
Intercom not working.	Other unit out of range; not properly paired for intercom.	Ensure both units are within range; re-establish intercom pairing.

If the problem persists, contact Nolan customer support for further assistance.

7. Technical Specifications

Specification	Detail
Model Name	M951 X
Item Weight	305 g
Package Dimensions	18.8 x 15.3 x 5.7 cm

Specification	Detail
Manufacturer Serial Number	BNCOM00000046
Color	Neutro
Brand	Nolan
Vehicle Service Type	Motorcycle
Material	Plastic
Sport	Motorcycle
Certificate Type	ECE
Closure Type	Buckle
Manufacturer	NOLAN

8. Warranty and Support

For information regarding warranty coverage, technical support, or service, please refer to the warranty card included with your product or visit the official Nolan website. Keep your proof of purchase for warranty claims.
