

YOYDA YOYDA-IPF01

YOYDA Bluetooth Transmitter for iPod (Model YOYDA-IPF01) Instruction Manual

Model: YOYDA-IPF01 | Brand: YOYDA

INTRODUCTION

This manual provides instructions for the YOYDA 30-pin Bluetooth Transmitter, designed to enable Bluetooth audio streaming from compatible iPod devices to Bluetooth-enabled headphones, speakers, or receivers. Please read this manual thoroughly before use to ensure proper operation and compatibility.

COMPATIBILITY

Compatible iPod Models:

- iPod Touch (3rd, 4th generation)
- iPod Nano (1st, 2nd, 3rd, 4th, 5th, 6th generation)
- iPod Video
- iPod Mini
- iPod Classic (*Note: Only original iPods manufactured after 2007 are compatible.*)

iPod Kompatible Modelle

The 30-pin audio adapter is compatible with Apple products with 30-pin connector, and is compatible with iPod Touch (3rd, 4th generation), iPod Nano (1st, 2, 3, 4, 5, 6), iPod Video, iPod Mini , iPod Classic compatible.

iPod Touch

iPod classic

iPod nano

iPod mini

Only original iPods produced after 2007 can be connected. The volume control can only be adjusted through iPod, not through speakers, headphones, car speakers and other devices.

Incompatible iPod Models:

- iPods manufactured prior to 2007
- iPod Touch 1st generation
- iPod Touch 2nd generation
- iPod Nano 6th generation (specific models may vary)
- iPod Mini (4GB)
- iPod Classic (30GB, 60GB, 80GB, 160GB)

Not compatible with iPods manufactured before 2007

Not compatible with iPod Touch 2nd generation and iPod Touch 1st generation,
iPod Nano 6, iPod Mini (4GB), iPod Touch 2nd generation,
iPod Touch 1st generation and iPod Classic (30GB).

Image: An iPod Classic (older model) and a Bluetooth headphone, illustrating that some older iPods are not compatible with the transmitter.

Bluetooth Device Compatibility Notes:

- The automatic pairing function is primarily for connecting with the iPod itself, not for automatically connecting to external Bluetooth devices like headphones or car speakers.
- Volume control can only be adjusted through the iPod. It cannot be controlled via connected speakers, headphones, or car audio systems.
- Not compatible with LG, Sonos, Move, and Roam Bluetooth speakers.
- Compatible with Bluetooth speakers such as Fugoo and Jam rewind.

Wireless Transmission Distance up to 33ft

Transmit crystal clear stereo audio signals to any Bluetooth recording device, Bluetooth headset, Bluetooth speaker or Bluetooth music receiver.

30-pin audio adapter Compatible with Apple products with 30-pin connector, Compatible with iPod Touch (3rd, 4th), iPod Nano (1st, 2, 3, 4, 5, 6), iPod Video, iPod Mini, iPod Classic.

SETUP AND INITIAL PAIRING

Follow these steps to set up and pair your YOUDA Bluetooth Transmitter with a Bluetooth audio device:

1. **Prepare Your Bluetooth Device:** Ensure that your Bluetooth headphones, speakers, or other receiving device are not currently paired with other devices (e.g., mobile phones, tablets). Turn on your Bluetooth receiving device and set it to pairing mode.
2. **Connect the Transmitter:** Plug the YOUDA Bluetooth Transmitter into the 30-pin connector port on your compatible iPod. The transmitter draws power directly from your iPod.
3. **Pairing:** The transmitter will automatically attempt to pair with nearby Bluetooth audio devices in pairing mode. Once connected, the indicator light on the transmitter (if present) will change to a steady state, or your Bluetooth audio device will confirm the connection.
4. **Start Playback:** Begin playing audio on your iPod. The sound should now transmit wirelessly to your paired Bluetooth device.

Bluetooth Transmitter

Streamen Sie Ihre Musik kabellos an Lautsprecher/Kopfhörer.

Must pay attention

The Bluetooth version of this product is 5.0, which does not support upward compatibility. Please make sure that the Bluetooth version of your receiving device meets the 5.0 protocol standard, otherwise it will not connect.

Since the device will automatically connect to all devices with Bluetooth turned on, please ensure that the only device you need to connect to within 10 meters is in Bluetooth turned on, otherwise it will connect to the wrong device.

Image: An iPod with the YOUDA transmitter plugged in, emitting a wireless signal towards a Bluetooth headphone, illustrating the connection process.

OPERATING INSTRUCTIONS

- **Power Source:** The transmitter is powered directly by your iPod. No external batteries or charging are required for the transmitter itself.
- **Battery Drain:** Using the transmitter will cause your iPod's battery to drain faster than usual. If your iPod's battery runs out, the transmitter will cease to function.
- **Volume Control:** Adjust the volume directly on your iPod. The transmitter does not support volume control from the connected Bluetooth audio device.
- **Range:** The effective wireless transmission range is up to 10 meters (33 feet). Obstacles and interference may reduce this range.

CARE AND MAINTENANCE

- Keep the device dry. Avoid exposure to moisture or liquids.
- Clean the device with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.

- Store the device in a cool, dry place when not in use.
- Avoid dropping or subjecting the device to strong impacts.

TROUBLESHOOTING

If your receiving device cannot connect:

1. **Check iPod Compatibility:** Ensure your iPod model was manufactured after 2007. Refer to the "Incompatible iPod Models" section.
2. **iPod Power:** Make sure your iPod is turned on and has sufficient battery power. The transmitter will not function if the iPod is off or has a depleted battery.
3. **Bluetooth Device Pairing Mode:** Confirm that your Bluetooth receiving device (headphones, speakers) is in pairing mode and not connected to other devices.
4. **Bluetooth Version:** The product's Bluetooth version is 5.0, which does not support upward compatibility. Ensure your receiving device's Bluetooth version meets the 5.0 protocol standard for optimal connection.
5. **Distance:** Ensure the iPod with the transmitter and the Bluetooth receiving device are within the 10-meter (33-foot) range.
6. **Interference:** Minimize potential interference from other wireless devices or physical obstructions.

HIFI Audio Transmission & Low Latency

Note: If your receiving device cannot connect, please follow the steps below to troubleshoot the problem

1. Make sure your iPod is a version after 2007
2. Make sure your iPod is turned on and has enough power
3. Make sure your adapter has been paired with your receiving device
