User Manual

TOP LOADING HOT AND COLD WATER DISPENSER

Brand: Kreiaoer | Model: OT-WMTZXL

1. Introduction

Thank you for choosing the Kreiaoer Top Loading Hot and Cold Water Dispenser. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new appliance. Please read it thoroughly before use and retain it for future reference.

This dispenser is designed to provide hot, cold, and warm water, accommodating 1.2 to 5-gallon water bottles, making it suitable for various environments such as homes and offices.

2. Safety Precautions

- Always plug the dispenser into a grounded electrical outlet.
- Do not operate the dispenser without a water bottle installed and water flowing.
- Keep children away from the hot water faucet to prevent burns.
- Do not immerse the dispenser, cord, or plug in water or other liquids.
- Unplug the dispenser before cleaning or performing any maintenance.
- Ensure proper ventilation around the unit.

3. Setup

3.1 Unpacking and Placement

Carefully remove the dispenser from its packaging. Place the unit on a flat, stable, and level surface, such as a countertop, away from direct sunlight and heat sources. Ensure there is adequate space around the dispenser for ventilation.

3.2 Water Bottle Installation

This dispenser features a top-loading design compatible with 1.2 to 5-gallon water bottles. Remove the cap from your water bottle. Carefully invert the bottle and place it securely onto the piercing probe on top of the dispenser. Ensure the bottle is seated firmly to prevent leaks.

OURS

**Compact and Lightweight

3.3 Initial Use and Power On

Once the water bottle is installed, allow a few minutes for the water reservoirs to fill. Plug the power cord into a grounded electrical outlet. Locate the power switch on the back of the unit and turn it ON. The indicator lights for Hot, Cold, and Warm water will illuminate as the dispenser begins to heat and cool the water to the desired

temperatures.

4. Operating Instructions

4.1 Dispensing Water

The dispenser offers three temperature settings: Hot, Cold, and Warm. To dispense water, place your cup or container under the desired faucet. For hot water, press and hold the 'Hot Water' button. For cold or warm water, simply press the corresponding lever or button. The one-handed operation allows for convenient dispensing.

Easy to Get Hot Water

Hold the hot water button to get hot water and give customized drinking experience simply

Coffee

Tea

Juice

5. Maintenance

5.1 Cleaning the Drip Tray and Barrel Seat

The dispenser features a detachable drip tray and barrel seat for easy cleaning. Regularly remove these components, wash them with mild soap and water, rinse thoroughly, and dry before reattaching. This helps prevent spills and maintains hygiene.

5.2 General Cleaning

Wipe the exterior of the dispenser with a soft, damp cloth. Do not use abrasive cleaners or solvents. Ensure the tight base prevents contaminants from entering the water system, contributing to overall cleanliness.

6. Troubleshooting

If you encounter any issues with your water dispenser, please refer to the table below for common problems and their solutions. If the problem persists, contact customer support.

| Problem | Possible Cause | Solution |
|---------|----------------|----------|
|---------|----------------|----------|

| Problem | Possible Cause | Solution |
|---------------------------|--|--|
| No water dispensing | Empty water bottle; Airlock; Faucet clogged | Replace bottle; Remove and re-seat bottle; Clean faucet |
| Water not hot/cold enough | Power switch off; Heating/cooling element malfunction | Ensure power is on; Allow time for temperature regulation; Contact support |
| Water leakage | Improperly seated bottle; Cracked bottle; Damaged internal component | Re-seat bottle; Replace bottle; Unplug and contact support |
| Unusual noise | Compressor cycling; Air in system | Normal operation; Dispense water to clear air |
