Biolomix SJ023

BioloMix Cold Press Juicer

Model: SJ-023

Important Safety Instructions

Please read all instructions carefully before using the appliance and retain them for future reference. Always follow basic safety precautions when using electrical appliances.

- **Electrical Safety:** Ensure the voltage indicated on the appliance corresponds to your local mains voltage before connecting. Do not immerse the motor base in water or any other liquid.
- **Children:** This appliance should not be used by children. Keep the appliance and its cord out of reach of children.
- **Supervision:** Close supervision is necessary when any appliance is used near children.
- **Damage:** Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- **Moving Parts:** Avoid contact with moving parts. Ensure all parts are correctly assembled before operation.
- **Feed Chute Safety:** Never push food with your fingers or other utensils into the feed chute. Always use the provided food pusher.
- **Overload Protection:** The juicer is equipped with an overload protection system. If the motor stops due to overload, turn off the appliance, unplug it, and allow it to cool down for 30 minutes before restarting.
- **Cleaning:** Always unplug the appliance from the power supply before cleaning and when not in use.
- **Intended Use:** This appliance is for household use only. Do not use it outdoors.

Product Overview

The BioloMix SJ-023 Cold Press Juicer is designed for efficient and quiet juice extraction, preserving nutrients and flavor. It features a large feed chute and a triple filtration system.

Components

Figure 1: Exploded view of the BioloMix SJ-023 Juicer components. Key parts include the juice jug, auger, juicing bowl with anti-drip spout, motor base, pulp jug, food pusher, cleaning brush, and power/reverse knob.

1. Juice Jug
2. Auger (Snail)
3. Juicing Bowl with Anti-Drip Spout
4. Motor Base
5. Pulp Jug
6. Food Pusher
7. Cleaning Brush
8. Power/Reverse Knob

Key Features

- **Extra Large Feed Chute:** A 130mm (5.11 inch) wide opening allows for whole fruits and vegetables, reducing preparation time.

Figure 2: The 130mm wide feed chute accommodates whole produce.

- **Triple Filtration System:** Equipped with 2mm (coarse), 0.8mm (medium), and 0.5mm (fine) mesh filters for increased juice yield and purity.

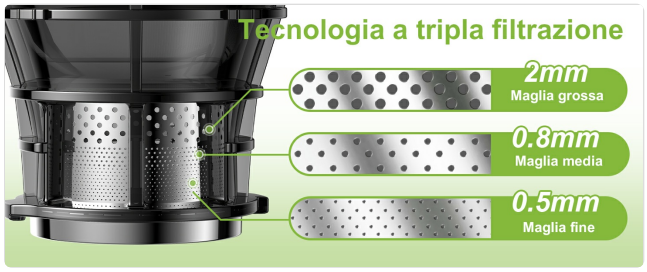

Figure 3: Detail of the triple filter system for optimal juice extraction.

- **Slow Masticating Technology:** Operates at 40-65 RPM to minimize oxidation, preserving more vitamins, minerals, and enzymes.
- **BPA-Free Materials:** All food-contact parts are made from BPA-free materials for safe and healthy juicing.
- **Safety Features:** The juicer stops automatically if the feed chute lid is opened during operation. It also includes a reverse function to clear clogs.
- **Easy Assembly & Cleaning:** Designed for quick assembly and disassembly. Includes a special cleaning brush, and parts are dishwasher safe (below 40°C).

Setup

Follow these steps to assemble your BioloMix Cold Press Juicer before first use.

Figure 4: Visual guide for assembling the juicer.

1. **Prepare the Juicing Bowl:** Ensure the silicone valve at the bottom of the juicing bowl is properly inserted into its slot.
2. **Place Juicing Bowl:** Position the juicing bowl onto the top part of the motor base, aligning it correctly.
3. **Insert Auger:** Insert the auger (snail) into the juicing bowl, ensuring it sits firmly.
4. **Attach Lid and Lock:** Place the lid onto the juicing bowl. Rotate the lid clockwise until it locks into place. The juicer will not operate if the lid is not securely locked.

Figure 5: Ensure the lid is locked for operation.

5. **Position Containers:** Place the juice jug under the juice spout and the pulp jug under the pulp outlet.
6. **Connect Power:** Plug the power cord into a suitable electrical outlet.

Operating Instructions

Follow these steps to extract juice from your fruits and vegetables.

Figure 6: Simplified juicing process.

1. **Prepare Ingredients:** Wash fruits and vegetables thoroughly. For very large items, you may need to cut them into pieces that fit the 130mm feed chute. Remove hard pits from fruits like peaches or plums.
2. **Load Ingredients:** Place the prepared fruits and vegetables into the large feed chute. The juicer is designed to handle whole produce, minimizing pre-cutting.
3. **Start Juicing:** Turn the power knob to the "ON" position. The juicer will begin to process the ingredients automatically. Use the food pusher only if necessary to gently guide ingredients down the chute.
4. **Reverse Function:** If ingredients get clogged or the juicer stops, turn the knob to the "R" (Reverse) position for a few seconds to clear the blockage, then return to "ON".
5. **Collect Juice and Pulp:** The fresh juice will flow into the juice jug, and the dry pulp will be expelled into the pulp jug.
6. **Finish Juicing:** Once all ingredients are processed, turn the power knob to the "OFF" position and unplug the appliance.

Figure 7: The juicer efficiently separates juice from pulp.

Maintenance and Cleaning

Regular cleaning ensures the longevity and optimal performance of your juicer.

Figure 8: Cleaning the juicer is simple with the included brush and dishwasher-safe parts.

1. **Disassembly:** Turn off and unplug the juicer. Disassemble all removable parts: lid, auger, juicing bowl, juice jug, and pulp jug.
2. **Rinse Immediately:** Rinse all removable parts under running water immediately after use to prevent pulp from drying and sticking.
3. **Use Cleaning Brush:** Use the provided cleaning brush to remove any stubborn pulp from the filter mesh and other components.
4. **Dishwasher Safe:** All removable parts are dishwasher safe. However, to prolong their lifespan, avoid washing them at temperatures above 40°C (104°F).
5. **Clean Motor Base:** Wipe the motor base with a damp cloth. Never immerse the motor base in water or any other liquid.
6. **Dry and Store:** Ensure all parts are completely dry before reassembling or storing the juicer.

7. **Important Note:** When cleaning the juicing bowl, open the sealing plug at the bottom to remove any residual pulp.

Troubleshooting

Refer to this section for common issues and their solutions.

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in. Lid not properly locked. Overload protection activated.	Ensure the power cord is securely plugged into an outlet. Check that the lid is rotated clockwise and fully locked into place. Unplug, wait 30 minutes for the motor to cool down, then try again. Reduce the amount of ingredients.
Motor stops during operation / Juicer is clogged.	Too much produce loaded at once. Hard ingredients causing blockage.	Turn the knob to "R" (Reverse) for a few seconds to clear the blockage, then switch back to "ON". If the issue persists, turn off, unplug, disassemble, clean, and reassemble. Feed ingredients slowly and in smaller quantities.
Low juice yield or wet pulp.	Filter mesh is clogged. Ingredients are too soft or overripe.	Clean the filter thoroughly with the cleaning brush. Process softer ingredients alternately with harder ones.
Loud noise or vibration.	Parts not assembled correctly. Hard object in the juicer.	Turn off, unplug, disassemble, and reassemble all parts carefully, ensuring they click into place. Ensure no foreign objects (e.g., fruit pits, seeds) are fed into the juicer.

Specifications

Attribute	Detail
Brand	Biolomix
Model	SJ023
Color	Grey
Product Dimensions	43.47 x 20 x 18 cm
Weight	4.5 Kilograms
Capacity	1.8 Liters (Juice Jug: 1000ml, Pulp Jug: 800ml)
Voltage	220 Volts (DC)
Motor Power	250W

Attribute	Detail
Special Features	Automatic Reverse, Silent Motor, Whole Fruit Processing, Triple Filter

Warranty and Support

For warranty information or technical support, please refer to the warranty card included with your product or contact BioloMix customer service directly. You can typically find contact details on the official BioloMix website or through your point of purchase.

Please have your model number (SJ-023) and purchase date ready when contacting support.
