OLEVS G6690

OLEVS G6690 Men's Automatic Watch Instruction Manual

Model: G6690

INTRODUCTION

Thank you for choosing the OLEVS G6690 Men's Automatic Watch. This timepiece combines elegant design with a reliable self-winding mechanical movement. Featuring a starry sky luminous dial, diamond and Roman numeral markers, and multi-functional subdials for 24-hour, moon phase, year, and month displays, this watch is crafted for both style and precision. This manual provides essential information for the proper setup, operation, and care of your watch.

KEY FEATURES

- **Multi-functional Dial:** Starry sky luminous dial with diamond and Roman scale, 24-hour display, moon phase indicator, and year/month windows.
- **Automatic Mechanical Movement:** Self-winding movement that does not require batteries. Supports manual winding for initial startup.
- **Premium Leather Strap:** Original leather strap (21cm) designed for comfort, breathability, and durability, featuring hypoallergenic lining and reinforced stitching.
- **Luminous Display:** Luminous hands and markers for easy time reading in low-light conditions.
- **Water Resistance:** 30M (3ATM) water resistance, suitable for daily water splashes, hand washing, and sweat. Not suitable for diving or showering.

SETUP

Initial Winding

Your OLEVS G6690 watch is an automatic mechanical timepiece. For the first use, or if the watch has stopped due to inactivity, manual winding is required. Turn the crown clockwise 30-40 times to initiate the movement and build up the power reserve. The watch will then continue to wind itself through your daily wrist movements.

Setting Time and Date

The watch features a crown and a concealed button for adjustments. Refer to the diagram below for specific functions:

PRODUCT PARAMETERS

Product Size

Case diameter	42MM
Case thickness	13MM
Chain width	Steel22/Skin22MM
Chain length	Steel20/Skin21CM

Brand model number:	OLEVS/6690
Mirror:	High hardness coated glass mirror
Watchband:	Steel / Leather
Movement:	Fully automatic
Waterproof:	30M
Watch weight:	Steel 148/Skin 76g

* Tips: All sizes are manually measured, there is a reasonable error, please prevail in kind

OPERATING YOUR OLEVS AUTOMATIC WATCH

Automatic Movement

The OLEVS G6690 features an automatic mechanical movement. Once initially wound, the watch will continue to operate as long as it is worn regularly. The natural motion of your wrist powers the internal rotor, which in turn winds the mainspring. If the watch is not worn for an extended period (typically 36-48 hours), it may stop and require manual winding to restart.

Multi-functional Dial

The watch dial is designed with several indicators:

Image: Detailed view of the multi-functional dial, highlighting the moon phase, date, and year/month indicators.

- **Moon Phase Display:** Located on the dial, this subdial indicates the current phase of the moon.
- **Date Display:** A subdial or window shows the current date.
- **Year/Month Window:** Displays the current year and month.
- **24-Hour Display:** An additional subdial tracks time in a 24-hour format.

MAINTENANCE AND CARE

Water Resistance

Your OLEVS G6690 watch is rated for 30 meters (3ATM) of water resistance. This means it is protected against accidental splashes, rain, and hand washing. It is **not** suitable for swimming, diving, showering, or any activities

involving prolonged water immersion or high-pressure water exposure. Ensure the crown is fully pushed in before any contact with water.

Cleaning

To maintain the appearance of your watch, wipe the case and crystal with a soft, dry cloth. For the leather strap, avoid excessive moisture and harsh chemicals. If the strap becomes dirty, gently wipe it with a slightly damp cloth and allow it to air dry completely.

Storage

When not wearing your watch for an extended period, store it in a cool, dry place away from direct sunlight, extreme temperatures, and strong magnetic fields. A watch box or pouch is recommended to protect it from dust and scratches.

TROUBLESHOOTING

- **Watch is not running:** If the watch has stopped, it may need manual winding. Turn the crown clockwise 30-40 times to restart the movement. Ensure you wear the watch regularly to keep the automatic movement powered.
- **Time or Date is incorrect:** Refer to the "Setting Time and Date" section for instructions on how to properly adjust the watch. Ensure the crown is fully pushed back in after adjustment.
- **Condensation under the crystal:** This may indicate a breach in water resistance. Avoid further contact with water and contact customer support immediately.
- **Unusual noises or erratic behavior:** If you notice any abnormal sounds or inconsistent timekeeping, discontinue use and contact customer support.
