KOPIDOE Compressed Air Duster / Car Vacuum Cleaner User Manual

Model: / | Brand: KOPIDOE

Introduction

The KOPIDOE Electric Air Duster and Car Vacuum Cleaner is a versatile 3-in-1 device designed for comprehensive cleaning. It functions as a powerful compressed air duster, a handheld vacuum cleaner, and an inflator pump. With its high-speed motor, adjustable gears, and portable design, it provides an efficient and eco-friendly solution for various cleaning tasks, from delicate electronics to car interiors and inflatable items.

Setup and Operation

Power On/Off and Speed Control

- To **Power On/Off**: Press and hold the power button for 3 seconds.
- To **Adjust Speed**: Short-press the power button to cycle through the three wind speed modes (Gear 1, Gear 2, Gear 3).
- **Gear 1**: Perfect for removing dust from lenses, projectors, and valuable items.
- **Gear 2**: Ideal for cleaning keyboards, desktops, and window sills.
- **Gear 3**: Provides maximum power for cleaning PC cases, furniture, fans, and car vents.

LED Light Operation

- To **Turn On/Off LED Light**: Press and hold the light button for 3 seconds. The LED light assists in illuminating dark corners for thorough cleaning.

Using Vacuum Mode

To use the device as a vacuum cleaner:

1. **Remove the dust cover** from the vacuum intake port.
2. **Install the filter** into the dust bin. Ensure the black rubber ring inside the filter is properly seated to prevent it from falling off during operation.
3. **Attach the appropriate vacuum nozzle** (e.g., the longer, thicker nozzle for vacuuming).
4. Power on the device and begin vacuuming.

Using Blow Mode

To use the device as an air duster:

1. **Ensure the dust cover is installed** on the vacuum intake port to prevent dust from entering the machine and damaging the motor.
2. **Attach the appropriate blowing nozzle** (e.g., the flat nozzle for concentrated airflow).
3. Power on the device and begin blowing.

Charging and Battery

The device is equipped with a built-in 6000mAh battery for extended use.

- **Charging Port**: Uses a Type-C charging port for convenient charging.
- **Charging Time**: Fully charges within 3-3.5 hours using the provided USB-C fast charging cable.
- **Running Time**: Provides continuous operation for 20-40 minutes depending on the selected gear (1st gear: 30-40 mins, 2nd gear: 25-30 mins, 3rd gear: 15-23 mins).
- **Charging Sources**: Can be charged via computer, mobile power supply, car charger, or adapter.
- **Battery Indicator**: The 3 blue indicators on the back flash alternately when charging, remain constantly on when working, and go off in sequence as the power decreases.
- **Important Note**: After the battery is drained, ensure to turn off the device before charging. Do not charge when the battery temperature is too high; wait for it to cool before charging.

Maintenance

Filter Cleaning

Regular cleaning of the filter is essential for maintaining optimal performance:

- After using the vacuum mode, remove the dust bin and filter.
- Rinse the filter with clean water.
- Allow the filter to air dry completely before re-installing it into the device.

General Care

- Wipe the exterior of the device with a soft, dry cloth.
- Store the device and its accessories in a cool, dry place away from direct sunlight and extreme temperatures.
- Avoid dropping the device or subjecting it to strong impacts.

Technical Specifications

Feature	Specification
Brand	KOPIDOE
Model Name	/
Motor Speed	Upgraded 100000RPM
Wattage	68 watts
Battery Capacity	6000 mAh (3*2000mAh built-in)
Battery Type	Lithium-Ion
Charging Time	3-3.5 hours
Runtime	Up to 40 minutes (varies by speed)
Product Dimensions	6.9"L x 2.2"W x 1.4"H (approximate)
Weight	375g (approximate)
Filter Type	HEPA Filter
Connectivity	USB Type-C
Number of Speeds	3
