1. INTRODUCTION

The KSADBOSSBO Body Camera is a versatile and portable device designed for audio and video recording in various outdoor and indoor settings. It features 1080P recording, a built-in flashlight with multiple modes, and a durable, waterproof design. This manual provides essential instructions for setting up, operating, and maintaining your body camera.

2. SETUP

2.1. Unboxing and Components

Before first use, ensure all components are present:

- 1x 64GB Body Camera
- 1x 28-inch Strap
- 1x User Manual
- 1x Type-C Charge Cable
- 1x SD Card Reader
- 1x Card Pin
- 1x Magnetic Necklace Lanyard

Image 2: Overview of the body camera and its complete accessories.

2.2. Charging the Device

The body camera is equipped with a 1000mAh rechargeable battery. To charge:

1. Connect the provided Type-C charge cable to the camera's Type-C port.
2. Connect the other end of the cable to a USB power source (e.g., computer, wall adapter).
3. The charging indicator light will show the charging status. A full charge takes approximately three hours.

Image 3: Charging the body camera via Type-C cable. Red light indicates charging, blue light indicates full charge.

Battery Life: Approximately 5.5 hours for recording only, 3 hours for flashlight only, and 2 hours for simultaneous flashlight and recording.

2.3. Memory Card

The camera comes with a built-in 64GB Micro SD card. This card is detachable for easy file management. Use the provided card pin to access the card slot if needed.

3. OPERATION

The body camera features two main buttons for control: a recording button (1) and a flashlight/warning light button (2).

Image 4: Front view of the body camera highlighting the two control buttons.

3.1. Recording Mode

1. To start recording: Short press button (1). The blue LED indicator will flash to confirm recording has started.
2. To stop recording: Long press button (1). The blue LED indicator will stop flashing.

The camera records in 1080P resolution at 30 frames per second. It supports loop recording, automatically overwriting the oldest files when the memory is full.

3.2. Flashlight Mode

The camera features four white light LEDs with three adjustable brightness modes.

1. To activate flashlight: Short press button (2).
2. To cycle through brightness modes (Strong, Medium, Low): Short press button (2) repeatedly.
3. To turn off flashlight: Continue short pressing button (2) until the light turns off, or long press button (2) to activate warning mode and then short press to turn off.

BRING YOU A COLORFUL NIGHT**

3 MODE SWITCHABLE FLASHLIGHT

Image 5: The body camera's flashlight function with three switchable modes.

3.3. Warning Mode (SOS)

The camera includes an SOS warning mode with flashing red and blue lights for enhanced visibility and safety.

1. To activate warning mode: Long press button (2). The red and blue lights will begin to flash. This mode will shield other LEDs.
2. To turn off warning mode: Long press button (2) again.

Video 1: Demonstration of the body camera's flashlight and warning light functions. This video shows how to activate and cycle through the different light modes, including the red and blue SOS warning lights.

3.4. Accessing Recorded Files

You can access recorded files using two methods:

1. **Direct USB Connection:** Connect the camera to a computer using the Type-C charge cable. The camera will appear as a removable drive, allowing you to transfer files.
2. **SD Card Reader:** Remove the Micro SD card from the camera and insert it into the provided SD card reader. Connect the card reader to your computer to access files.

Read File By Two Methods

Image 6: Illustrates connecting the camera directly via USB or using an SD card reader to access recorded files.

4. MAINTENANCE

4.1. Waterproofing

The body camera has an IP65 waterproof rating, meaning it is protected against dust ingress and low-pressure water jets from any direction. It is suitable for use in rain or wet conditions but should not be submerged in water.

3 MODES FLASHLIGHT
WATERPROOF IP65

MULTI FUNCTION CAM

Image 7: The body camera's IP65 waterproof feature, suitable for outdoor use.

4.2. Lens Protection

A protective tab covers the camera lens when not in use, safeguarding it from scratches and damage during transport or storage.

5. TROUBLESHOOTING

- **Camera not recording:** Ensure the battery is charged and the Micro SD card is properly inserted. Short press button (1) to initiate recording; the blue LED should flash.
- **Flashlight not working:** Short press button (2) to activate the flashlight. If it doesn't turn on, ensure the battery is charged.
- **Difficulty accessing files:** Try both methods (direct USB connection and SD card reader). Ensure the USB cable is securely connected and the SD card is correctly inserted into the reader. If using a computer, check if the device or card is recognized.
- **Video playback issues:** Some older devices or software might have compatibility issues with AVI video files. Try playing files on a different device or using a different media player.
- **Short battery life:** Battery life can vary based on usage, especially when using the flashlight at high brightness or recording continuously. Ensure the device is fully charged before extended use.
- **Water ingress:** While rated IP65, the camera is not designed for submersion. Ensure the rubber cover for the ports is securely closed to maintain water resistance.

6. SPECIFICATIONS

Feature	Detail
Model Name	Flashlight 64GB Body camera
Video Capture Resolution	1080p
Frame Rate	30 fps
Viewing Angle	120 Degrees
Water Resistance Level	IP65 Water Resistant
