Roomratv 52in Smart Fan T5 Ceiling Light Kit User Manual

Model: LK-T5-BK

INTRODUCTION

This manual provides essential information for the safe and efficient installation, operation, and maintenance of your Roomratv 52in Smart Fan T5 Ceiling Light Kit. Please read this manual thoroughly before installation and retain it for future reference.

SAFETY INFORMATION

WARNING: To reduce the risk of electric shock, ensure power is turned off at the circuit breaker or fuse box before beginning installation or performing any maintenance.

CAUTION: All wiring must be in accordance with national and local electrical codes. If you are unfamiliar with wiring, consult a qualified electrician.

- Do not install this light kit in wet or damp locations. This product is for indoor use only.
- Ensure the mounting surface can support the weight of the light kit.
- Do not attempt to modify the light kit in any way.
- Keep packaging materials away from children.

PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Roomratv T5 Ceiling Light Kit (1)
- Bulb (1) - *as per product specifications*
- Installation Hardware (screws, wire nuts, etc.) - *may vary*
- User Manual (this document)

Image: The Roomratv T5 Ceiling Light Kit, featuring a circular design with a black outer frame and a white light-diffusing surface. This is the main component of the light kit.

SETUP AND INSTALLATION

This light kit is designed for flush mount installation with compatible ceiling fans. Refer to your ceiling fan's manual for specific instructions on attaching light kits.

1. **Turn Off Power:** Before starting, ensure the power supply to the ceiling fan is completely disconnected at the circuit breaker.
2. **Prepare Wiring:** Carefully identify the electrical wires from the ceiling fan that are designated for the light kit. Typically, these include a hot wire (black), a neutral wire (white), and a ground wire (green or bare copper).
3. **Connect Wires:**
 - Connect the black wire from the light kit to the black (hot) wire from the fan using a wire nut.
 - Connect the white wire from the light kit to the white (neutral) wire from the fan using a wire nut.

- Connect the green or bare copper ground wire from the light kit to the ground wire from the fan or the fan's mounting bracket.

Ensure all connections are secure and insulated with wire nuts.

4. **Mount Light Kit:** Align the light kit with the designated mounting points on the ceiling fan. Secure it using the provided screws or according to your fan's instructions. Ensure it is firmly attached and flush with the fan housing.
5. **Install Bulb:** Insert the provided bulb into the light kit's socket.
6. **Restore Power:** Once installation is complete and all connections are secure, restore power at the circuit breaker.

OPERATING INSTRUCTIONS

The Roomratv T5 Ceiling Light Kit operates in conjunction with your ceiling fan's light control system. This typically involves a wall switch, pull chain, or remote control provided with your ceiling fan.

- **Turning On/Off:** Use the designated light switch on your wall, the pull chain on your fan, or the light button on your fan's remote control to turn the light kit on or off.
- **Dimming (if applicable):** If your ceiling fan system supports dimming and is compatible with the LED bulb, you may be able to adjust the light intensity using the fan's dimmer control. Refer to your fan's manual for dimming capabilities.

MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your light kit.

- **Cleaning:** Before cleaning, ensure the power is off. Wipe the light kit with a soft, dry cloth. Do not use abrasive cleaners or solvents, as they may damage the finish or electrical components.
- **Bulb Replacement:**
 - a. Turn off power at the circuit breaker.
 - b. Allow the bulb to cool completely if it has been recently in use.
 - c. Carefully remove the old bulb.
 - d. Install a new bulb of the same type and wattage. The product uses an LED light source.
 - e. Restore power.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Light does not turn on.	<ul style="list-style-type: none">• No power to the fan/light.• Loose wire connections.• Faulty bulb.	<ul style="list-style-type: none">• Check circuit breaker and wall switch.• Turn off power, check all wire connections.• Replace bulb.
Light flickers.	<ul style="list-style-type: none">• Loose bulb.• Incompatible dimmer (if applicable).	<ul style="list-style-type: none">• Tighten bulb.• Ensure dimmer is compatible with LED lights.
