7. TROUBLESHOOTING

This section addresses common issues you might encounter with your storage cabinet.

- **Wobbling Cabinet:**

- Ensure the cabinet is placed on a flat, level surface.
- Adjust the leveling feet located at the bottom of the golden metal base until the cabinet is stable.
- Verify that all assembly screws are securely tightened. Over-tightening can strip screws, while under-tightening can lead to instability.

- **Doors Not Aligning:**

- Check the hinge adjustments. Most hinges allow for minor adjustments to align doors horizontally, vertically, and in depth.
- Ensure the cabinet frame is square and level.

- **Missing Parts or Damaged Components:**

- Carefully re-check all packaging materials. Small parts can sometimes be overlooked.
- Contact customer support immediately with your product model number and a description of the issue.
