Yard Force MB400-UK

Yard Force MB400 Robotic Lawnmower User Manual

Model: MB400-UK

INTRODUCTION

Thank you for choosing the Yard Force MB400 Robotic Lawnmower. This manual provides essential information for the safe and efficient operation, installation, and maintenance of your new robotic lawnmower. Please read this manual thoroughly before using the product and keep it for future reference. The MB400 is designed to provide effortless lawn care for gardens up to 400m², featuring app control and a durable design.

SAFETY INFORMATION

Always prioritize safety when operating and maintaining the robotic lawnmower. Failure to follow safety instructions can result in serious injury or damage to the product.

- Read all instructions carefully before use.
- Keep hands and feet away from the cutting blades.
- Do not operate the mower in wet conditions or during rain.
- Ensure the boundary wire is correctly installed to prevent the mower from leaving the designated area.
- Turn off the mower and remove the safety key before performing any maintenance or cleaning.
- Keep children and pets away from the working area of the mower.
- Only use original spare parts and accessories.
- Do not lift or carry the mower while it is operating.

PACKAGE CONTENTS

Verify that all items are present in the package before beginning installation.

- Yard Force MB400 Robotic Lawnmower
- Charging Station
- Charging Station Cover
- Power Adapter
- Boundary Wire
- Pegs for Boundary Wire
- Spare Blades
- User Manual (this document)
- Safety Key

SETUP

1. Charging Station Installation

Select a flat, level area near an outdoor power outlet for the charging station. Ensure there is enough clear space around the station for the mower to dock easily.

1. Place the charging station on a firm, level surface.
2. Connect the power adapter to the charging station and plug it into a suitable outdoor power outlet.
3. Ensure the power cable is routed safely to avoid tripping hazards or damage.
4. Install the provided charging station cover to protect it from weather elements.

2. Boundary Wire Installation

The boundary wire defines the mowing area. It must be installed correctly for the mower to operate within the desired boundaries.

1. Lay the boundary wire around the perimeter of your lawn, ensuring it is taut and free of kinks.
2. Use the provided pegs to secure the wire to the ground every 80-100 cm.
3. Maintain a minimum distance of 30 cm from obstacles such as walls, fences, and ponds.
4. Connect both ends of the boundary wire to the designated terminals on the charging station.
5. Ensure the indicator light on the charging station is green, indicating a successful wire connection.

3. Initial Charging

Before first use, fully charge the robotic lawnmower.

1. Place the mower manually into the charging station.
2. Ensure the mower makes proper contact with the charging pins.
3. The charging indicator on the mower will illuminate. Allow several hours for a full charge.

4. App Setup (Bluetooth)

The Yard Force MB400 can be controlled via a Bluetooth app for convenient scheduling and settings adjustments.

1. Download the "Yard Force" app from your smartphone's app store.
2. Enable Bluetooth on your smartphone.
3. Open the app and follow the on-screen instructions to pair with your MB400 robotic lawnmower.
4. Once paired, you can set mowing schedules, adjust settings, and monitor the mower's status.

OPERATING

1. Starting and Stopping the Mower

1. **To Start:** Insert the safety key, press the START button, and close the cover. The mower will begin its mowing cycle or return to the charging station if scheduled.
2. **To Stop:** Press the large STOP button on top of the mower. The mower will immediately cease operation.

2. Adjusting Cutting Height

The cutting height can be adjusted to suit your lawn's needs, ranging from 20mm to 55mm.

1. Locate the cutting height adjustment knob on the top of the mower.
2. Rotate the knob clockwise to decrease the cutting height (shorter grass) or counter-clockwise to increase it (longer grass).
3. Adjust the height gradually to avoid stressing the lawn.

3. Scheduling (via App)

Use the Yard Force app to set up a mowing schedule that fits your lifestyle.

1. Open the Yard Force app on your paired smartphone.
2. Navigate to the "Schedule" or "Timer" section.
3. Set desired mowing times and days. The mower will automatically start and return to the charging station as programmed.

4. Rain Sensor

The MB400 is equipped with a rain sensor that detects precipitation.

1. If rain is detected, the mower will pause its operation and return to the charging station.
2. Mowing will resume automatically after the rain stops and the sensor dries, or at the next scheduled time.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your robotic lawnmower. Always turn off the mower and remove the safety key before any maintenance.

1. Cleaning the Mower

1. **Underside:** Regularly clean grass clippings from the cutting deck and wheels using a brush or damp cloth. Do not use a high-pressure washer.
2. **Body:** Wipe the exterior with a soft, damp cloth.
3. **Charging Contacts:** Clean the charging contacts on both the mower and the charging station with a dry cloth to ensure good connection.

2. Blade Replacement

Blades should be replaced regularly (e.g., every 1-3 months, depending on usage) to maintain cutting efficiency.

1. Turn off the mower and remove the safety key.
2. Carefully turn the mower upside down.

3. Using a screwdriver, remove the screws holding the old blades in place.
4. Replace with new blades and screws, ensuring they are securely fastened.
5. Always replace all blades at the same time for balanced cutting.

3. Battery Care

The MB400 is equipped with a 20V/2.0Ah lithium-ion battery.

1. Always store the mower in a cool, dry place when not in use for extended periods.
2. For winter storage, ensure the battery is fully charged before storing. Recharge every 3-4 months if stored for longer periods.
3. Do not expose the battery to extreme temperatures.

4. Winter Storage

Prepare your mower for winter to protect it from cold temperatures and ensure longevity.

1. Thoroughly clean the mower and charging station.
2. Fully charge the battery.
3. Store the mower and charging station in a dry, frost-free environment.
4. Disconnect the boundary wire from the charging station and store it if desired, or leave it buried/pegged.

TROUBLESHOOTING

This section addresses common issues you might encounter with your Yard Force MB400.

Problem	Possible Cause	Solution
Mower does not start.	Safety key not inserted; Battery low; STOP button pressed.	Insert safety key; Charge battery; Release STOP button.
Mower stays in charging station.	No schedule set; Boundary wire issue; Rain sensor active.	Set schedule via app; Check boundary wire connection/integrity; Wait for rain sensor to dry.
Mower cuts unevenly.	Dull blades; Uneven terrain.	Replace blades; Ensure lawn is relatively level.
Mower gets stuck frequently.	Obstacles in mowing area; Steep slopes.	Clear obstacles; Adjust boundary wire to exclude problematic areas.
App connection issues.	Bluetooth off; Mower out of range; App not updated.	Ensure Bluetooth is on; Move closer to mower; Update app to latest version.

SPECIFICATIONS

Technical details for the Yard Force MB400 Robotic Lawnmower.

Model: MB400-UK

Product Dimensions: 38.4D x 20.6W x 44H cm

Item Weight: 8.2 kg

Power Source: Battery Powered (20V/2.0Ah Lithium-Ion)

Cutting Width: 16 cm

Cutting Height: 20-55 mm (Adjustable)
Recommended Lawn Size: Up to 400m²
Material: Plastic
Operation Mode: Automatic
Connectivity: Bluetooth App Control
Features: Rain Sensor, Charging Station Cover

WARRANTY AND SUPPORT

Yard Force products are manufactured to high quality standards. For warranty information, technical support, or to purchase spare parts, please refer to the official Yard Force website or contact their customer service.
