5. OPERATING (HOW TO PLAY)

The objective of Perched on a Tree is to place all five birds onto the wooden tree according to the clues provided in the selected challenge.

- 1. Understand the Clues:** Each challenge presents a starting configuration or specific conditions for placing the birds. These clues might indicate:
 - The position of certain birds (e.g., a red bird on the top left branch).
 - The relative position of birds (e.g., a blue bird must be above a yellow bird).
 - Empty spaces that must remain empty.
- 2. Place the Birds:** Using the provided clues, strategically place the five clip-on birds onto the designated spots on the

wooden tree. The birds can be clipped onto the circular openings on the tree branches.

3. **Solve the Challenge:** A challenge is successfully solved when all five birds are placed on the tree, and their positions satisfy all the conditions and clues given in the challenge. There is only one correct solution for each challenge.
