Global Commander Portable Air Conditioner Unit User Manual

Model: PAG-S06KCO630C

INTRODUCTION

Thank you for choosing the Global Commander Portable Air Conditioner Unit. This manual provides important information for the proper operation, maintenance, and troubleshooting of your new appliance. Please read this manual thoroughly before using the unit and keep it for future reference. This unit is designed to provide efficient cooling, dehumidification, and fan functions for residential and indoor use only.

SAFETY INFORMATION

To reduce the risk of fire, electrical shock, or injury when using your air conditioner, follow these basic precautions:

- Read all instructions before using the appliance.
- Connect to a properly rated, grounded power outlet only.
- Do not operate the unit with a damaged cord or plug.
- Do not block air openings. Ensure proper ventilation.
- Do not insert fingers or foreign objects into the air inlet/outlet.
- Keep the unit away from flammable materials and heat sources.
- Always unplug the unit before cleaning or servicing.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

SETUP

Proper setup is crucial for optimal performance of your portable air conditioner.

1. Placement

Place the unit on a flat, stable surface in the room you wish to cool. Ensure there is at least 20 inches (50 cm) of space around the unit for proper airflow. The unit is fitted with wheels for easy movement.

2. Window Kit Installation

The portable air conditioner requires an exhaust hose to vent hot air outside. Install the window kit as follows:

1. Assemble the window sealing plate kit according to the instructions provided with the kit.
2. Open the window and place the window sealing plate into the window opening. Adjust the length of the plate to fit the window securely.
3. Connect one end of the exhaust hose to the air outlet on the back of the air conditioner unit.
4. Connect the other end of the exhaust hose to the adapter on the window sealing plate. Ensure all connections are tight to prevent hot air from re-entering the room.

3. Power Connection

Plug the power cord into a grounded 115V electrical outlet. Do not use extension cords or power strips.

OPERATING INSTRUCTIONS

Your Global Commander Portable Air Conditioner offers multiple operating modes for your comfort.

1. Power On/Off

Press the **Power** button (⏻) on the control panel or remote control to turn the unit on or off.

2. Mode Selection

Press the **Mode** button (⏻) repeatedly to cycle through the available modes:

- **Cooling Mode:** Provides powerful cooling. Set your desired temperature using the temperature adjustment buttons.
- **Dehumidifier Mode:** Reduces humidity in the air. The fan speed will be fixed in this mode.
- **Fan Mode:** Circulates air without cooling. You can adjust the fan speed.

3. Temperature Adjustment

In Cooling Mode, use the **+** and **-** buttons on the control panel or remote to set your desired temperature. The temperature range is typically 62°F (17°C) to 86°F (30°C).

4. Fan Speed

In Cooling or Fan Mode, press the **Fan Speed** button () to select between two-speed automatic ventilation settings (Low, High).

5. Timer Function

The 24-hour programmable timer allows you to set the unit to turn on or off automatically. Press the **Timer** button () and use the + and - buttons to set the desired time.

6. Remote Control

The wireless remote control allows you to operate all functions of the air conditioner from a distance. Ensure there are no obstructions between the remote and the unit's receiver.

MAINTENANCE

Regular maintenance ensures the longevity and efficiency of your air conditioner.

1. Air Filter Cleaning

The unit features an easy-to-clean washable and reusable filter. A dirty filter can reduce cooling efficiency and airflow.

1. Unplug the air conditioner from the power outlet.
2. Locate and remove the air filter (refer to the diagram in the Product Overview section for location).
3. Wash the filter under running water (warm, soapy water if very dirty).
4. Allow the filter to air dry completely before reinstalling it. Do not expose to direct sunlight.
5. Reinstall the dry filter into the unit.

2. Water Drainage

During dehumidification or cooling in high humidity, water will accumulate inside the unit. The unit has an internal self-evaporation system, but in very humid conditions, the water tank may fill up. If the tank is full, the unit will stop operating and display an error code (refer to Troubleshooting). Drain the water by removing the drain plug at the bottom of the unit and allowing water to flow into a suitable container.

3. Storage

If the unit will not be used for an extended period:

- Drain any accumulated water completely.
- Clean the air filter.
- Unplug the power cord and coil it neatly.
- Store the unit in a cool, dry place, away from direct sunlight and extreme temperatures.

TROUBLESHOOTING
