3. INSTALLATION GUIDE

Follow these steps carefully for a bubble-free installation:

3.1. Preparation

1. Ensure your SOUYIE SW-7 Smart Watch is powered off.
2. Clean the watch screen thoroughly using the **Wet Wipe (labeled 'Wipes 1')** to remove any smudges or oils.
3. Immediately follow with the **Dry Wipe (labeled 'Wipes 2')** to dry the screen completely.
4. Use the **Dust Absorber Sticker** to gently dab the screen and remove any remaining dust particles. Ensure no dust is visible before proceeding.

3.2. Applying the Screen Protector

5. Carefully peel off the protective film from the adhesive side of the tempered glass screen protector. Avoid touching the adhesive surface.
6. Align the screen protector precisely with the edges of your SOUYIE SW-7 Smart Watch screen. Ensure it is centered and straight.
7. Gently lower the screen protector onto the watch screen. It will begin to adhere automatically.
8. If any small bubbles appear, gently push them towards the edges of the screen using your finger or the provided microfiber cleaning cloth.
9. Once applied, lightly press down on the edges of the screen protector to ensure full adhesion.

4. CARE AND MAINTENANCE

- To clean the screen protector, use a soft, lint-free cloth. For stubborn smudges, a slightly damp cloth with water can be used.
- Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the screen protector's coating.
- While the screen protector is highly durable, extreme impacts can still cause damage. Handle your watch with care.

5. TROUBLESHOOTING

5.1. Bubbles After Installation

- **Small Bubbles:** Most small bubbles will disappear naturally within 24-48 hours. Gently push them towards the edges with a microfiber cloth.
- **Large Bubbles/Dust:** If a large bubble persists or is caused by a dust particle, carefully lift the nearest corner of the screen protector using a thin card (like a credit card) and a piece of tape to remove the dust. Reapply slowly.

5.2. Adhesion Issues

- Ensure the screen was completely clean and dry before application. Any moisture or oil can prevent proper adhesion.
- Apply firm, even pressure across the entire surface after placement to ensure the adhesive bonds fully.
