1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out. Refer to the parts list in your included printed manual to ensure all pieces are present.
2. **Assemble the Frame:** Begin by connecting the main steel frame components according to the diagrams. Do not fully tighten bolts until the entire frame is assembled to allow for flexibility.

TROUBLESHOOTING

If you encounter issues with your gazebo, refer to these common solutions.

- **Gazebo feels unstable:** Ensure all frame connections are securely tightened. Verify that the anchoring kit is properly installed and secured to the ground. If on a hard surface, consider additional weights or bolting options.
- **Canopy does not fit correctly:** Double-check that the adjustable frame tubes are correctly set and that the canopy is oriented properly. Ensure all corners and edges are evenly stretched and secured. Loosen frame bolts slightly, adjust canopy, then re-tighten.
- **Water pooling on canopy:** Ensure the canopy is taut and properly tensioned to allow water to run off. The 2-tier design is intended to prevent excessive pooling. If pooling occurs, check for proper assembly and adjust tension.
