GAOMON Hardtop Gazebo

GAOMON 10'x12' Hardtop Gazebo Instruction Manual

Model: Hardtop Gazebo

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your GAOMON 10'x12' Hardtop Gazebo. Please read all instructions carefully before beginning assembly and retain this manual for future reference. Proper assembly and care will ensure the longevity and safe use of your gazebo.

SAFETY INFORMATION

WARNING: Failure to follow these safety instructions may result in injury or damage to the product.

- Always assemble this gazebo with at least **two people**. Attempting assembly alone can be difficult and unsafe.
- Secure the gazebo to the ground using the provided stakes to prevent tipping, especially in windy conditions. Additional anchoring may be required depending on local weather and ground conditions.
- Be cautious when touching the polycarbonate roof after prolonged exposure to sunlight as it may become hot.
- Do not hang heavy objects from the gazebo frame or roof structure.
- Ensure all connections are tightened securely during assembly and periodically check for loose fasteners.
- Clear snow accumulation from the roof promptly to prevent structural damage.

PACKAGE CONTENTS

Your GAOMON Hardtop Gazebo package typically arrives in two boxes. Please verify all components are present before beginning assembly. Refer to the included parts list in your physical manual for exact quantities and identification.

- Aluminum Frame Components (posts, beams, connectors)
- Polycarbonate Roof Panels
- Double-Layered Curtains (UV-protective fabric and mesh netting)
- Ground Stakes and Fasteners
- Assembly Tools (basic wrenches, hex keys, if included)
- Instruction Manual

SETUP AND ASSEMBLY

Assembly of the GAOMON Hardtop Gazebo requires careful attention to detail and multiple individuals. It is recommended that **2-5 people** participate in the assembly process, which typically takes **4-6 hours**.

Preparation

1. Choose a level and stable location for your gazebo. Ensure adequate clearance around the structure.
2. Unpack all components and lay them out on a clean, soft surface to prevent scratches. Organize parts by their labels (e.g., sticker letters) as indicated in the physical manual.
3. Identify all hardware and tools required.

Assembly Steps (General Overview)

Refer to the detailed installation videos and the step-by-step diagrams in your physical manual for precise instructions.

1. **Assemble the Base Frame:** Connect the horizontal beams to the vertical posts, ensuring all connections are finger-tight initially.
2. **Install Roof Supports:** Attach the roof support beams to the top of the main frame.
3. **Attach Polycarbonate Roof Panels:** Carefully place and secure the polycarbonate panels onto the roof structure. Ensure panels are correctly oriented to allow for proper water runoff. The sleek roof slope design is intended to prevent rain from gathering.
4. **Secure the Gazebo:** Once the main structure is assembled, position the gazebo in its final location. Use the provided ground stakes through the pre-drilled bases of the pillars to anchor the gazebo firmly to the ground.
5. **Install Curtains and Netting:** Slide the double-layered curtains onto the double-track system. The curtains include both UV-protective fabric and mesh netting.

STURDY PILLARS WITH HIGH DURIBILITY

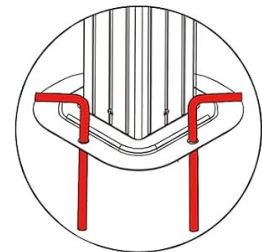

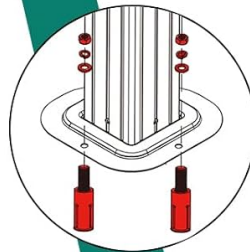

Sturdy

Easy Installation

Equipped with rust-proof thick ground nails for pre-drilled bases

✱ Easy installation & very sturdy

OPERATION

Curtains and Netting

The gazebo features a double-track system for its curtains and netting, allowing for flexible use:

- **UV and Rain Protection:** The outer fabric curtains can be closed to provide privacy, block harmful UV rays, and offer protection from light rain.
- **Ventilation and Insect Protection:** The inner mesh netting can be closed independently to allow for airflow while keeping insects out. The mesh curtain is equipped with zippers for easy access.
- **Open Configuration:** Both curtains and netting can be tied back to enjoy an open-air environment.

DOUBLE-LAYERED CURTION

Thickened Nettings

Double tracks

Double zippers

Multifunctional Top Design

The gazebo's top structure includes integrated hooks, allowing you to hang lights or a fan for enhanced comfort and ambiance. Ensure any hung items are within the weight capacity of the hooks and properly secured.

MULTIFUNCTIONAL TOP DESIGN

MAINTENANCE

Regular maintenance will help preserve the appearance and structural integrity of your gazebo.

- **Frame:** The powder-coated aluminum frame is weather-resistant and designed to prevent fade, rust, and corrosion. Clean the frame periodically with a mild soap and water solution, then rinse thoroughly and dry.
- **Polycarbonate Roof:** The durable polycarbonate roof protects against various weather conditions and blocks 99% of harmful UV rays. Clean the roof panels with a soft cloth, mild soap, and water. Avoid abrasive cleaners or brushes that could scratch the surface.
- **Curtains and Netting:** The removable curtains and mesh netting can be cleaned according to their fabric care instructions, typically spot cleaning with mild soap and water. Ensure they are completely dry before storing or re-installing to prevent mildew.
- **Fasteners:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten as necessary.
- **Winter Care:** While the hardtop is designed for all seasons, it is advisable to clear heavy snow accumulation from the roof to prevent excessive stress on the structure. Consider removing curtains and netting for storage during harsh winter months to extend their lifespan.

REMOVABLE CURTAINS TO DIVERSIFY YOUR OCCASIONS

Image: The gazebo is designed for use in various weather conditions, from sunny to snowy.

TROUBLESHOOTING

- **Difficulty during Assembly:** If you encounter difficulties, ensure you have at least two people assisting. Refer to the detailed diagrams in the manual and any available installation videos. Verify that all parts are correctly identified and oriented according to the instructions.
- **Missing Parts:** If any parts are missing upon unpacking, contact GAOMON customer support immediately with your purchase information and a list of missing components.
- **Gazebo Instability:** Ensure the gazebo is placed on a level surface. Verify that all frame connections are securely tightened. Confirm that the provided ground stakes are fully inserted into the ground. Consider additional anchoring methods for increased stability in high winds.
- **Water Accumulation on Roof:** The roof is designed with a slope to prevent water gathering. If water accumulates, check for proper panel installation and ensure no debris is blocking the natural runoff path.

SPECIFICATIONS

Feature	Detail
Brand	GAOMON
Model Number	Hardtop Gazebo
Product Dimensions	144"L x 120"W x 109"H (12' L x 10' W x 9.1' H)
Frame Material	Aluminum (Powder Coated)
Roof Material	Polycarbonate
Water Resistance Level	Waterproof

Ultraviolet Light Protection	Yes (Blocks 99% harmful UV rays)
Assembly Required	Yes (Recommended 2-5 people, 4-6 hours)
