## 7. TROUBLESHOOTING

If you encounter any issues with your cat tree, refer to the following common solutions:

- **Wobbling:** If the cat tree wobbles, ensure it is placed on a level surface. Re-tighten all screws, especially those connecting the base and main support posts. If wobbling persists, ensure the anti-tip kit is correctly installed and secured to a wall stud.
- **Loose Parts:** Periodically check all hanging toys and platforms. Reattach or tighten any loose components.
- **Cats Not Using Scratching Posts:** Try sprinkling catnip on the sisal posts to attract your cat. Demonstrate scratching by gently guiding your cat's paws or using your own nails on the posts.
- **Damage:** For significant damage to any structural component, contact Globlazer customer service for assistance.
