Rapoo MT760Mini

Rapoo MT760Mini Wireless Mouse User Manual

Model: MT760Mini

1. PRODUCT OVERVIEW

The Rapoo MT760Mini is a versatile wireless mouse designed for multi-device connectivity and enhanced productivity. It supports Bluetooth 5.0/3.0 and 2.4GHz multi-mode connections, allowing seamless switching between up to four devices. Key features include adjustable DPI, programmable buttons, ergonomic design, and flexible charging options.

3. SETUP AND CONNECTIVITY

3.1. Powering On and USB Receiver Connection

1. Locate the USB receiver (dongle) stored in the magnetic compartment on the underside of the mouse.
2. Insert the USB receiver into an available USB port on your computer.
3. Turn on the mouse using the power switch located on the underside. The mouse will automatically attempt to connect via 2.4GHz.

3.2. Bluetooth Connection

The MT760Mini supports Bluetooth 5.0 and 3.0. You can pair it with up to three Bluetooth devices.

1. Turn on the mouse.
2. Press the Bluetooth channel switch button on the underside of the mouse to select a desired Bluetooth channel (1, 2, or 3). The indicator light for the selected channel will blink slowly.
3. Press and hold the selected Bluetooth channel button for approximately 3 seconds until the indicator light blinks rapidly. This indicates the mouse is in pairing mode.
4. On your device (computer, laptop, phone, iPad), go to Bluetooth settings and search for "Rapoo MT760Mini" or a similar device name.
5. Select the mouse to complete the pairing process. The indicator light on the mouse will turn solid for a few seconds and then turn off.

3.3. Switching Between Devices

To switch between connected devices (2.4GHz or Bluetooth 1/2/3), simply press the corresponding channel switch button on the underside of the mouse.

4. OPERATING INSTRUCTIONS

4.1. DPI Adjustment

The mouse features 7 adjustable DPI levels: 800, 1000, 1200, 1600, 2400, 3200, and 4000. Press the DPI button (located on the top of the mouse, below the scroll wheel) to cycle through these settings. The current DPI level may be indicated by an LED or through the driver software.

7 Adjustable DPI Levels

7 preset DPI values (800, 1000, 1200, 1600, 2400, 3200, 4000), you can also adjust the DPI values in 50 intervals via the mouse driver.

4.3. M+ Cross-Computer Technology

This technology allows you to seamlessly control multiple computers by moving the cursor to the edge of your screen. It automatically switches between screens, enabling you to transfer text, images, and files. This feature requires the Rapoo mouse driver to be installed on all connected computers, and all computers must be connected to the same Wi-Fi or Ethernet network.

4.4. Ergonomic Design and Scroll Wheels

The mouse features an ergonomic bow-back design with thumb support, providing comfort during extended use. It includes a Hall magnetic induction side scroll wheel and a center button scroll wheel for smooth and precise navigation.

Comfortable to Use

Ergonomic palm grip and thumb rest, position your hand more naturally and reduce hand strain over long periods of work.

5. MAINTENANCE AND CHARGING

5.1. Charging the Mouse

The MT760Mini is equipped with an 800mAh Li-Po battery and supports USB-C quick charging. Connect the provided USB-C cable to the mouse's charging port and to a power source (e.g., computer USB port, USB wall adapter). A full charge can last up to 90 days, though battery life may vary based on usage frequency and device conditions.

5.2. Wireless Charging

The mouse is compatible with most Qi wireless charging mouse pads. For continuous wireless charging during use, the P3 Wireless Charging Module (sold separately) is required.

90 Days Battery Life, Works with Wireless Charging System

Add P3 Wireless Charging Module* for continuous wireless charging while at use. Never worry about battery power any more.

6. TROUBLESHOOTING

If you encounter issues with your Rapoo MT760Mini mouse, consider the following:

- **No Connection:** Ensure the mouse is powered on. For 2.4GHz, check if the USB receiver is properly inserted and the mouse is set to 2.4G mode. For Bluetooth, ensure the mouse is in pairing mode (rapidly blinking LED) and your device's Bluetooth is enabled.
- **Lag or Disconnection:** Check battery level. Ensure the mouse is within range of the receiver or Bluetooth device. Reduce interference from other wireless devices.
- **M+ Cross-Computer Not Working:** Verify that the Rapoo mouse driver is installed on all computers and that all computers are connected to the same Wi-Fi or Ethernet network.
- **Buttons Not Responding/Customizing:** Install or update the Rapoo mouse driver software. Ensure the software is running and the mouse is recognized.
- **Tracking Issues:** Clean the mouse sensor on the underside. Ensure you are using the mouse on a suitable surface (it works on most surfaces).
- **Restore Default Settings:** If customization issues persist, you can restore the mouse to its factory

default settings via the driver software.
