

BoxWave AT-5189

BoxWave ClearTouch Anti-Glare Privacy Screen Protector User Manual

For Anytone AT-5189

1. INTRODUCTION

This manual provides instructions for the installation and care of your BoxWave ClearTouch Anti-Glare Privacy Screen Protector, designed specifically for the Anytone AT-5189 device. This product is engineered to protect your device's screen while enhancing privacy and reducing glare.

2. PRODUCT OVERVIEW

The BoxWave ClearTouch Anti-Glare Privacy Screen Protector offers multiple benefits:

- **Privacy Protection:** The screen protector limits viewing angles, making your screen content visible only to those directly in front of the device.
- **Anti-Glare Surface:** A matte finish disperses light, reducing reflections and glare for improved visibility in various lighting conditions.
- **Scratch Resistance:** Made from a strong, flexible material, it guards your screen against scratches and minor abrasions.
- **Fingerprint Reduction:** The matte surface helps to repel smudges and fingerprints, keeping your screen cleaner.
- **Precise Fit:** Custom-cut for the Anytone AT-5189, ensuring full access to all ports and buttons.

BoxWave

ClearTouch® ANTI-GLARE PRIVACY

- CLARITY**
UV glare Guard

4. INSTALLATION INSTRUCTIONS

Follow these steps for optimal installation:

1. **Clean the Screen:** Use the included microfiber cloth to thoroughly clean your device's screen. Ensure there are no dust particles, smudges, or fingerprints. A clean screen is crucial for bubble-free application.
2. **Align the Protector:** Carefully align the screen protector with your device's screen. Pay attention to the edges, cutouts for speakers, cameras, and buttons to ensure a perfect fit.
3. **Remove Backing:** Once aligned, gently peel off the bottom protective layer of the screen protector. Avoid touching the adhesive side.
4. **Apply to Screen:** Slowly lower the screen protector onto your device's screen. The glueless adhesive will automatically cling. If bubbles appear, use the applicator card to gently push them towards the nearest edge.
5. **Final Touches:** Smooth out any remaining small bubbles with the microfiber cloth or applicator card. Small bubbles may dissipate over 24-48 hours.

5. OPERATING PRINCIPLES

Once installed, the screen protector functions passively to enhance your device experience:

- **Privacy:** The specialized filter embedded in the protector restricts the viewing angle. Your screen will appear

dark or obscured to anyone attempting to view it from an angle greater than approximately 25 degrees from the center.

- **Anti-Glare:** The matte finish reduces reflections from ambient light sources, making your screen easier to read in bright environments.
- **Touch Sensitivity:** The protector is designed to maintain the original touch sensitivity of your Anytone AT-5189 screen.

6. MAINTENANCE

To maintain the clarity and effectiveness of your screen protector:

- **Cleaning:** Use the provided microfiber cloth or a similar soft, lint-free cloth to gently wipe the screen protector. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaning solution. Avoid harsh chemicals or abrasive materials.
- **Avoid Sharp Objects:** While the protector offers scratch resistance, extreme pressure or sharp objects can still damage it.
- **Replacement:** If the screen protector becomes heavily scratched or damaged, it can be carefully removed and replaced with a new one from the 2-pack.

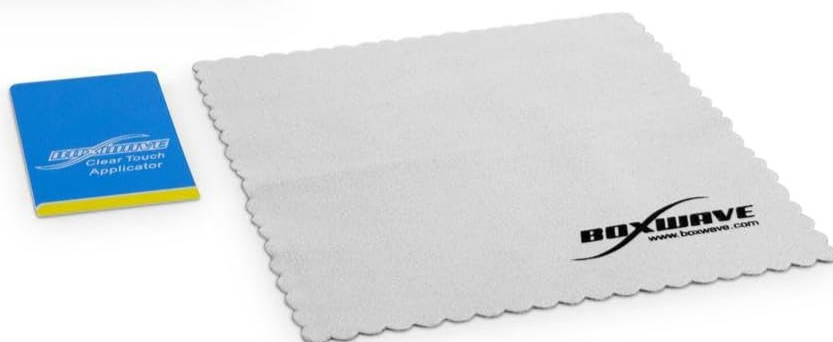

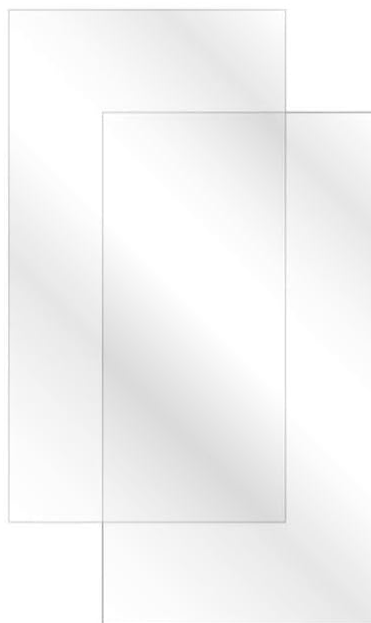

7. TROUBLESHOOTING

If you encounter issues during or after installation, consider the following:

- **Bubbles:** Most bubbles are caused by dust particles. If large bubbles persist, carefully lift a corner of the protector (using a piece of tape if necessary) to remove the dust with the microfiber cloth, then reapply. Small bubbles often disappear within 24-48 hours.
- **Misalignment:** If the protector is significantly misaligned, gently peel it off and reapply, ensuring proper alignment before fully pressing it down.
- **Reduced Touch Sensitivity:** Ensure the screen protector is fully adhered without air gaps. If issues persist, verify your device's touch settings.

8. SPECIFICATIONS

Feature	Detail
Brand	BoxWave
Model Compatibility	Anytone AT-5189
Material	Polyethylene Terephthalate (PET)
