SETUP

2.4GHz Wireless Connection (PS5, PS4, PC, Steam Deck)

1. Insert the USB Wireless Transmitter into an available USB port on your console or PC.
2. Power on your Stealth 600 headset by holding the Power Button until the LED illuminates.
3. The headset and transmitter will automatically pair. A solid LED on both indicates a successful connection.
4. On PS5/PS4, ensure the audio output is set to the headset. On PC, select the headset as your default audio device.

Bluetooth Connection (Mobile Devices)

1. Power on your Stealth 600 headset.
2. Press and hold the Bluetooth button on the headset until the LED flashes blue rapidly, indicating pairing mode.
3. On your mobile device, go to Bluetooth settings and select "Stealth 600" from the list of available devices.
4. The headset LED will turn solid blue once paired.
5. Use the QuickSwitch button to easily toggle between 2.4GHz wireless and Bluetooth audio sources.

OPERATING INSTRUCTIONS

Charging

Connect the supplied USB-A to USB-C charging cable from the headset's USB-C port to a USB port on your console, PC, or a USB wall adapter. The headset features quick charge capability. A full charge provides up to 80 hours of battery life.

Power On/Off

To power on, press and hold the Power Button until you hear an ascending tone and the LED illuminates. To power off, press and hold the Power Button until you hear a descending tone and the LED turns off.

Microphone Operation

The integrated microphone is activated by flipping it down. To mute the microphone, flip it up until it clicks into place. The microphone features A.I.-based noise reduction for clear communication.

Image: A close-up of the Stealth 600 headset's flip-to-mute microphone, illustrating the A.I. noise reduction feature with sound wave graphics.

Audio Presets

Press the Mode Button to cycle through four built-in audio presets: Bass Boost, Signature Sound, Treble Boost, and Vocal Boost. Custom presets can be configured via the Swarm II app.

Variable Mic Monitoring

Adjust the level of your own voice heard through the headset using the secondary wheel (if mapped to this function) or through the Swarm II app. This helps prevent shouting during gameplay.

Remappable Controls

The secondary wheel and Mode button can be remapped to various functions using the Turtle Beach Swarm II app. This allows for personalized control over settings such as Game/Chat Mix, Variable Mic Monitoring, Superhuman Hearing volume, Bluetooth volume, Bass & Treble Boost levels, and Noise Gate Threshold.

SWARM II APP CUSTOMIZATION

The Swarm II companion app, available for PC, iOS, and Android, provides advanced customization options for your Stealth 600 headset. Through the app, you can:

- Access a 10-band audio EQ to create up to five custom audio presets.
- Adjust microphone sensitivity, noise gate, and monitoring levels.
- Program the mappable wheel and mode button to suit your preferences.
- Activate and adjust Turtle Beach's exclusive Advanced Superhuman Hearing sound setting.
- Update headset firmware to ensure optimal performance.

MAINTENANCE

To ensure the longevity and optimal performance of your Stealth 600 headset, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the headset. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. The lay-flat design allows for convenient storage.
- **Battery Care:** For best battery health, avoid fully discharging the battery frequently. Charge the headset regularly, especially if not used for extended periods.
- **Cable Management:** Handle the charging cable with care to prevent damage.

TROUBLESHOOTING

If you encounter issues with your Stealth 600 headset, refer to the following common solutions:

- **No Audio/Connection Issues:**
 - Ensure the headset and USB Wireless Transmitter are properly paired (solid LED).
 - Verify the headset is selected as the default audio output device on your console or PC.
 - For PS5, navigate to System Settings > Network > Settings > Set Up Internet Connection. Hover over your Wi-Fi, press Options, and set Wi-Fi Frequency Bands to 5 GHz only to minimize interference with the headset's 2.4GHz wireless.
 - Consider using a USB 3.0 extender for the wireless dongle to prevent overheating and improve signal stability, especially if the dongle is placed in a confined space.

- Ensure no other 2.4GHz devices are causing significant interference nearby.
- **Microphone Not Working:**
 - Ensure the microphone is flipped down to unmute.
 - Check microphone settings in your console/PC audio settings and in the Swarm II app.
- **Poor Sound Quality:**
 - Adjust EQ settings via the Mode button or the Swarm II app.
 - Ensure the headset firmware is up to date using the Swarm II app.
- **Battery Not Charging:**
 - Try a different USB port or charging cable.
 - Ensure the charging cable is securely connected to both the headset and the power source.
