The projector's advanced LED technology and uniform illumination method ensure exceptional image quality with vibrant colors, while minimizing blue light exposure for eye protection.

4. SETUP

Follow these steps to set up your VISSPL projector for the first time:

1. **Power Connection:** Connect the power cord to the projector and then to a power outlet.
2. **Placement:** Position the projector on a stable surface. The included mini tripod can be used to adjust the height and angle.
3. **Focus Adjustment:** Turn the FOCUS dial on the top of the projector until the image appears clear and sharp on your projection surface.
4. **Keystone Correction:** Use the KEYSTONE dial to adjust the image's vertical angle, ensuring a rectangular projection even if the projector is not perfectly aligned with the screen. The projector supports $\pm 15^\circ$ keystone correction.
5. **Source Selection:** Use the remote control or the buttons on the projector to select your desired input source (HDMI, USB, AV, or Wireless).

Connecting Devices

The V16PRO offers multiple ways to connect your devices:

- **HDMI:** Connect devices like TV sticks, laptops, or gaming consoles using the provided HDMI cable.
- **USB:** Insert a USB drive to play media files directly.
- **AV:** Use the AV cable to connect older devices.
- **Wireless (WiFi 6):** Connect to your home network for faster and smoother streaming from compatible devices.
- **Bluetooth 5.2:** Pair with external Bluetooth speakers or headphones for enhanced audio.

Important Note on Streaming Services

Due to HDCP (High-bandwidth Digital Content Protection) copyright issues, streaming services like Netflix, Disney+, and Hulu prohibit playing movies directly from the projector when mirroring from a smartphone or tablet. To access these services, please use a TV Stick (not included) connected via the HDMI port.

5. OPERATING INSTRUCTIONS

Once set up, operating your VISSPL projector is straightforward:

- **Power On/Off:** Use the power button on the projector or the remote control to turn the device on or off.
- **Menu Navigation:** Use the directional buttons on the remote or projector to navigate through the on-screen menu. The 'OK' button confirms selections, and the 'Return' button goes back.
- **Volume Control:** Adjust the audio volume using the dedicated volume buttons on the remote control. The built-in HiFi speaker provides powerful and dynamic audio.
- **Screen Size:** The projector supports a screen size range of 35 to 160 inches. For optimal performance, especially in brighter environments, a darker room is recommended.

The intuitive interface allows for easy selection of media types, including movies, music, photos, and text files, directly from connected USB devices or through wireless casting.

6. MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your VISSPL projector:

- **Lens Cleaning:** Use the provided cleaning kit or a soft, lint-free cloth to gently clean the projector lens. Avoid abrasive materials that could scratch the lens.
- **Ventilation:** Ensure the projector's air inlets and outlets are unobstructed to prevent overheating. The advanced cooling system reduces fan noise by 50% compared to other projectors, but proper airflow is still crucial.
- **Lamp Life:** The built-in energy-saving LED lamps are designed to extend the useful life up to 80,000 hours, minimizing the need for frequent replacements.
- **Storage:** When not in use, cover the lens with the provided cap and store the projector in a cool, dry place away from direct sunlight and excessive dust.

7. TROUBLESHOOTING

If you encounter any issues with your VISSPL projector, please refer to the following common solutions:

- **Blurry Image:** Adjust the FOCUS dial on the top of the projector. Ensure the projection surface is flat and the distance is within the recommended range.
- **Trapezoidal Image:** Use the KEYSTONE dial to correct the image's shape.
- **No Sound:** Check the volume settings on both the projector and the connected device. Ensure external speakers are properly connected via Bluetooth or the audio port.
- **No Signal:** Verify that the input source is correctly selected (HDMI, USB, AV). Check all cable connections for security.
- **Streaming App Issues (Netflix, Disney+, Hulu):** As noted, these apps may not function directly via screen mirroring due to HDCP copyright protection. Please use a TV Stick connected to the HDMI port for these services.
- **Overheating:** Ensure proper ventilation around the projector. Avoid blocking air vents. If the projector overheats, it may automatically shut down. Allow it to cool before restarting.
