SETUP

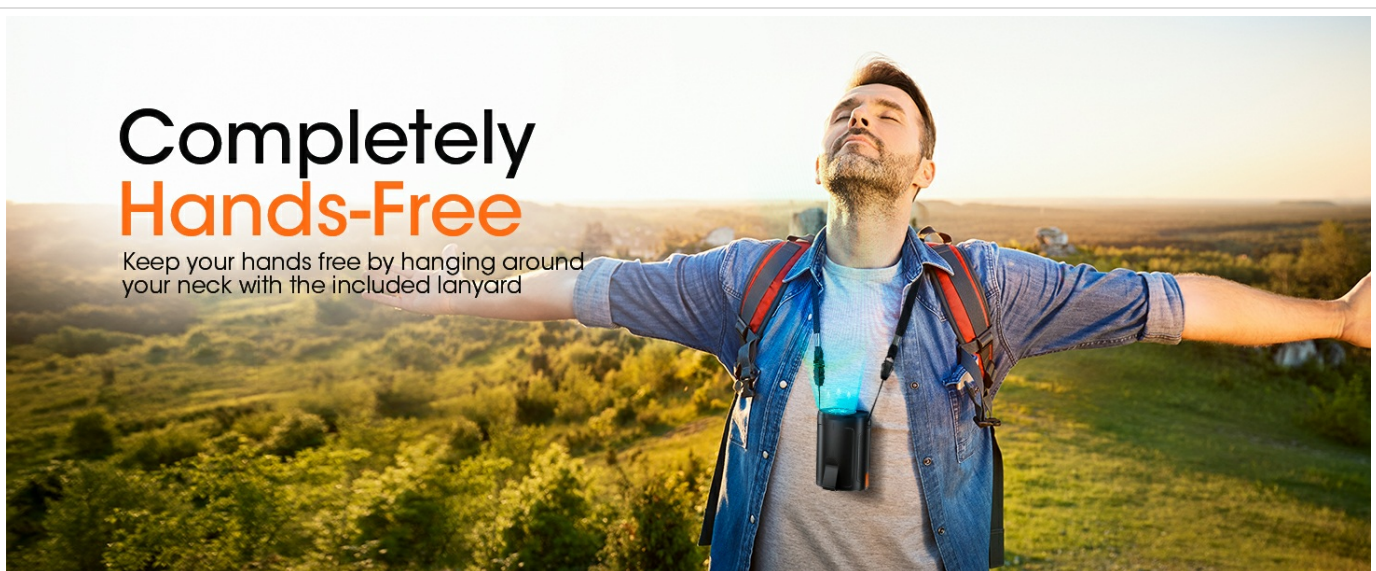

1. **Initial Charge:** Before first use, fully charge the fan using the provided USB-C charging cable. Connect the cable to the fan's Type-C charging port and a compatible power source (wall adapter, power bank, computer USB port). The intelligent AI energy-saving chip ensures efficient charging.
2. **Attaching the Neck Lanyard:** If you prefer to wear the fan around your neck, attach the included lanyard to the designated attachment points on the fan.
3. **Wearing as a Waist Fan:** The fan features a dual-clip design. Clip the larger clip to your belt or waistband. For optimal airflow under your clothing, use the smaller inner clip to secure your outer garment (e.g., shirt hem) to the fan, creating a channel for air circulation.

OPERATING INSTRUCTIONS

1. **Power On/Off:** Locate the power button on the side of the fan. Press and hold the button for a few seconds to turn the fan on or off.
2. **Adjusting Fan Speed:** Once powered on, short press the power button to cycle through the 4 available speed settings. Each press will increase the fan speed, from a gentle breeze to an invigorating blast. The fan is equipped with a high-speed brushless motor and a 5-blade turbo fan, providing airflow speeds up to 20 ft/s and up to 6600 RPM.
3. **Battery Life:** The fan offers up to 4.5-25 hours of continuous use on a single charge, depending on the selected wind speed.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the exterior of the fan. Do not use harsh chemicals or abrasive materials. Ensure the fan is turned off before cleaning.
- **Storage:** Store the fan in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Battery Care:** To prolong battery life, avoid fully discharging the fan frequently. Recharge it regularly, even if not in constant use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Fan does not turn on.	Low battery; Power button not pressed correctly.	Charge the fan fully. Press and hold the power button firmly.
Weak airflow.	Low speed setting; Air intake/outlet blocked.	Increase fan speed. Ensure air intake (bottom) and outlet (top) are clear of obstructions.
Fan makes unusual noise.	Debris in fan blades; Internal issue.	Turn off the fan and carefully check for any obstructions in the blades. If noise persists, contact customer support.
