TECHPICCO DNB-Colorado WTLT-BK

TECHPICCO Mud Flaps Instruction Manual

Model: DNB-Colorado WTLT-BK
Compatible with Chevy Colorado Z71 WT LT 2023-2025

1. PRODUCT OVERVIEW

The TECHPICCO Mud Flaps are designed to provide comprehensive protection for your Chevy Colorado Z71 WT LT (2023, 2024, 2025 models). This set of four mud guards shields your vehicle from road debris such as dirt, gravel, and fragments, helping to maintain its appearance and paint finish. They are engineered for a precise fit and durable performance.

2. IMPORTANT COMPATIBILITY NOTICE

NOTICE: These mud flaps are specifically designed for Chevy Colorado Z71 WT LT models from 2023, 2024, and 2025. They are **NOT compatible with GMC Canyon models**. Furthermore, these mud flaps **WILL NOT fit Chevy Colorado models equipped with fender flares**. Please verify your vehicle's configuration before installation.

4. INSTALLATION GUIDE

The TECHPICCO Mud Flaps are designed for easy, hassle-free installation without the need for drilling or complex modifications. The installation process is screw-in, directly behind the front and rear wheels.

Installation Steps:

1. Ensure your vehicle is parked on a level surface and the engine is off.
2. Locate the existing screw points behind each wheel. The mud flaps are designed to align with these factory points.
3. Position the mud flap against the fender, aligning the holes on the mud flap with the existing screw holes on your vehicle.
4. Secure the mud flap using the provided screws. Ensure they are tightened firmly but do not overtighten to avoid stripping.
5. Repeat the process for all four wheels.

No drilling is required; simply align the holes and screw in the fasteners.

**COMPATIBLE WITH CHEVY
COLORADO Z71 WT LT 2023 2024**

- Screw in the Screws
- No Drilling Required
- Just Align the Holes and

5. OPERATING AND BENEFITS

Once installed, your TECHPICCO Mud Flaps operate passively to protect your vehicle. They effectively block and deflect road debris, preventing it from splashing onto your vehicle's paintwork, undercarriage, and other components. This continuous protection helps to:

- Reduce paint chips and scratches caused by flying gravel.
- Minimize dirt and mud accumulation on the vehicle's sides.
- Protect sensitive undercarriage components from corrosive elements like salt and chemicals.
- Maintain the aesthetic appeal and resale value of your vehicle.

6. MAINTENANCE

Maintaining your TECHPICCO Mud Flaps is simple and requires minimal effort. Regular cleaning will ensure their longevity and continued effectiveness:

- **Routine Cleaning:** Periodically rinse the mud flaps with water to remove accumulated dirt, mud, and road grime. A mild car soap can be used for more stubborn stains.
- **Inspection:** Occasionally inspect the mud flaps for any signs of damage or loose screws. Re-tighten any loose screws as needed.
- **Material Care:** The PP+TRP material is designed to be durable and flexible, resisting cracking and fading under normal conditions. Avoid using harsh chemicals or abrasive cleaners that could degrade the material.

By reducing the amount of debris hitting your vehicle, these mud flaps also contribute to less frequent and easier car washes for the vehicle body itself.

7. TROUBLESHOOTING

While TECHPICCO Mud Flaps are designed for straightforward installation and reliable performance, here are some common issues and their solutions:

- **Mud Flaps Do Not Fit:**

- **Solution:** Re-verify your vehicle's model, year, and trim level. Crucially, confirm that your Chevy Colorado does **NOT** have factory or aftermarket fender flares, as these mud flaps are not compatible with such configurations. Also, ensure it is not a GMC Canyon.

- **Missing or Damaged Hardware:**

- **Solution:** Upon receiving the product, immediately check all package contents against the parts list. If any hardware is missing or damaged, contact TECHPICCO customer support for assistance.

- **Screws Stripping During Installation:**

- **Solution:** Ensure you are using the correct size screwdriver or bit for the provided screws. Apply steady, even pressure and avoid overtightening. If screws continue to strip, consider using high-quality replacement screws of the same type and size.

- **Mud Flaps Seem Too Small:**

- **Solution:** Refer to the specifications section for exact dimensions. While designed for a precise fit, individual perception of size may vary. Ensure proper alignment during installation.

8. SPECIFICATIONS

Attribute	Detail
Brand	TEHPICCO
Model Number	DNB-Colorado WTLT-BK
Color	Black
Material	PP+TRP Composite
Vehicle Service Type	Chevy Colorado Z71, WT, LT (2023, 2024, 2025)
