2. Getting Started

2.1. Package Contents

Before proceeding, please verify that all items are present in your package:

- Vasco V4 Language Translator Device
- USB-C Charging Cable
- Wall Adapter
- Lanyard
- Tempered Glass Screen Protector
- Screen Protector Installation/Cleaning Kit

Contents of the Vasco V4 Translator package, including the device, charging accessories, and lanyard.

2.2. Charging the Device

Before first use, fully charge your Vasco V4 device. Connect the USB-C charging cable to the device's USB-C port and the other end to the wall adapter. Plug the adapter into a power outlet. The device will indicate charging status on its screen.

2.3. Powering On/Off

- **To Power On:** Press and hold the power button (located on the side of the device) until the Vasco logo appears on the screen.
- **To Power Off:** Press and hold the power button until the power-off options appear. Select 'Power Off' on the screen.

2.4. Screen Protector Installation

The included tempered glass screen protector offers superior scratch protection with a 9H hardness rating. Follow these steps for effortless installation:

1. **Clean the Screen:** Use the provided cleaning kit to thoroughly clean the device screen, removing any dust, smudges, or fingerprints. Ensure the screen is completely dry.
2. **Align the Protector:** Carefully align the tempered glass screen protector with the device's screen, ensuring the cutouts for the camera and sensors match perfectly.
3. **Apply:** Gently place the protector onto the screen. It will adhere automatically. If bubbles appear, gently push them towards the edges using a soft cloth.

3. Operating Instructions

3.1. Voice Translation

The Vasco V4 provides instant voice translation for 108 languages. To use this feature:

1. From the main menu, select the 'Voice Translator' icon.
2. Choose your source language and target language.
3. Press and hold the microphone button corresponding to your language and speak clearly into the device.
4. Release the button, and the device will instantly translate and speak the phrase in the target language.

3.2. Photo Translation

Translate text from images using the built-in camera:

1. Select the 'Photo Translator' icon from the main menu.
2. Point the device's camera at the text you wish to translate. Ensure good lighting and focus.
3. Tap the capture button on the screen.
4. The device will process the image and display the translated text.

3.4. Supported Languages

The Vasco V4 supports a wide array of languages for voice and photo translation. A comprehensive list is provided below:

A detailed list of languages supported by the Vasco V4 Translator, indicating capabilities for voice input, voice output, and photo translation.

4. Maintenance and Care

- **Cleaning:** Use a soft, lint-free cloth to clean the device screen and body. Avoid abrasive materials or harsh chemicals.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Protection:** While the device is durable, avoid dropping it or exposing it to excessive force. The tempered glass screen protector adds an extra layer of defense.

5. Troubleshooting

Common Issues and Solutions:

- **Device not turning on:**
Ensure the device is fully charged. Connect it to the charger for at least 30 minutes before attempting to power it on again. If the issue persists, perform a soft reset by holding the power button for an extended period (e.g., 15-20 seconds).
- **Translation not working or inaccurate:**
Check your internet connection (though it has lifetime internet, ensure the signal is not obstructed in very remote areas). Speak clearly and directly into the microphone. Ensure the correct source and target languages are selected. For photo translation, ensure good lighting and clear text.
- **Screen unresponsive:**
Try restarting the device. If the screen remains unresponsive, ensure it is clean and free of debris.
- **Battery draining quickly:**
Reduce screen brightness. Close unused applications running in the background. Ensure the device is not in an area with very poor signal, which can cause it to consume more power searching for a connection.

6. Specifications

Feature	Specification
---------	---------------

Display	5" 576x1440
Processor	Quad-core Mediatek Helio A22 (MT6761) 64 bit
RAM	2 GB
ROM	32 GB
