

## Generic A 5mm

# Aquarium Tank Lid Clips User Manual

Model: A 5mm

## 1. PRODUCT OVERVIEW

The Aquarium Tank Lid Clips are designed to securely hold glass covers on various types of aquariums, including open tanks, grass tanks, and pet glass tanks. These clips are made from high-strength stainless steel, ensuring durability and stability. Each clip includes a silicone cushion to protect the aquarium glass from damage during installation and use.

### Key Features:

- **Durable Construction:** Made from high-strength stainless steel for long-lasting use.
- **Glass Protection:** Equipped with silicone cushions to prevent scratching or damaging the aquarium cover.
- **Easy Installation:** Compact design allows for quick and simple fastening.
- **Multifunctional Use:** Helps maintain tank temperature, reduce evaporation, isolate dust, and minimize external noise, contributing to a stable environment for aquatic pets.
- **Universal Compatibility:** Suitable for glass thicknesses of approximately 5mm.

## 2. SETUP AND INSTALLATION

Follow these steps to properly install the aquarium tank lid clips:

1. **Prepare the Aquarium:** Ensure the rim of your aquarium tank is clean and free from debris where the clips will be placed.
2. **Position the Glass Cover:** Carefully place your aquarium glass cover onto the tank rim in its desired position.
3. **Attach the Clips:** Slide the aquarium lid clips onto the edge of the glass cover and the tank rim simultaneously. The clip should firmly grip both the glass lid and the tank edge. Ensure the silicone cushion is positioned between the clip and the glass to prevent scratching.
4. **Distribute Evenly:** For optimal stability, distribute the clips evenly around the perimeter of the glass cover. For larger covers, use more clips as needed to prevent sagging or displacement.
5. **Verify Security:** Gently test the glass cover to ensure it is securely held in place by the clips. It should not easily shift or lift.

Figure 3: Clips securely holding an aquarium lid in place, providing a clear view of the aquatic environment within the tank.

### 3. OPERATING INSTRUCTIONS

These clips are passive support devices. Once installed, they function by holding the aquarium lid securely in place. No active operation is required. To access the tank, simply lift the glass cover. The clips will remain attached to the glass or the tank rim, depending on how they were positioned, allowing for easy removal and replacement of the lid.

### 4. MAINTENANCE

To ensure the longevity and effectiveness of your aquarium tank lid clips, follow these maintenance guidelines:

- **Regular Cleaning:** Periodically wipe the clips with a damp cloth to remove any water spots, algae, or mineral buildup. Avoid abrasive cleaners that could damage the stainless steel finish.
- **Inspect Silicone Cushions:** Check the silicone cushions for any signs of wear, tear, or degradation. If a cushion is damaged, it may reduce the clip's grip and protection. While replacements are not typically provided, ensure the existing cushions are intact.
- **Corrosion Check:** Although made of stainless steel, prolonged exposure to harsh aquarium chemicals or saltwater without proper cleaning can potentially lead to minor corrosion. Inspect for any

signs of rust and clean promptly.

- **Storage:** If removing clips for extended periods, store them in a dry place to prevent any potential material degradation.

## 5. TROUBLESHOOTING

Here are some common issues and their solutions:

Problem	Possible Cause	Solution
Lid is not secure / Clips slide	Incorrect glass thickness; clips not fully seated; silicone cushion displaced or missing.	Ensure your aquarium glass thickness is approximately 5mm. Re-seat the clips firmly. Check and adjust the silicone cushions.
Clips scratch the glass	Silicone cushion is missing or improperly positioned.	Verify that the silicone cushion is correctly placed between the clip and the glass surface.
Clips appear corroded	Prolonged exposure to water or chemicals without cleaning.	Clean the clips regularly with fresh water and dry them thoroughly. For minor spots, a gentle polish may help.

## 6. SPECIFICATIONS

Product Name	Aquarium Tank Lid Clips
Model	A 5mm
Material	Stainless Steel
Color	Black
Compatible Glass Thickness	Approximately 5mm
Package Includes	4 Pieces Aquarium Tank Glass Clips
