Aoxun G30014

Aoxun 10' x 12' Hardtop Gazebo User Manual

Model: G30014 | Brand: Aoxun

Introduction

Thank you for choosing the Aoxun 10' x 12' Hardtop Gazebo. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new outdoor pavilion. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

Safety Information

Important Safety Precautions:

- Secure the gazebo to a stable foundation during extreme weather conditions to prevent damage or injury.
- Handle heavy components with care during assembly to avoid personal injury or damage to parts.
- Ensure proper assembly with the assistance of 3-4 people. This is not a one-person assembly task due to the size and weight of components.
- Always wear appropriate safety gear, such as gloves and safety goggles, during assembly.
- Keep children and pets away from the assembly area.

Setup and Assembly

The Aoxun Hardtop Gazebo is designed for straightforward assembly, but requires multiple individuals for safe and efficient setup. All necessary hardware and numbered parts are included. Refer to the detailed, illustrated instructions provided in the packaging for step-by-step guidance.

Pre-Assembly Checklist:

- Verify all parts and hardware against the material list in the instruction manual.
- Clear a large, flat area for assembly.
- Gather necessary tools (e.g., power impact driver for bolts, step ladder).
- Ensure at least 3-4 people are available to assist with lifting and securing components.

Key Assembly Features:

Image: Triangular reinforcement beams for enhanced stability and robust anchoring brackets for secure mounting.

The frame features a triangular structure for unwavering stability. Robust anchoring brackets with pre-drilled holes are provided for easy attachment to various surfaces (expansion screws not included).

Image: Wind resistance capabilities vary based on installation method, with ground stakes and expansion bolts significantly enhancing stability.

For optimal wind resistance, utilize ground stakes (39-46MPH) or expansion bolts (47-55MPH) to secure the gazebo to your chosen surface. Simply placing it on the ground provides 31-38MPH resistance.

Operating Features

Your Aoxun Hardtop Gazebo is designed for comfort and versatility in various outdoor conditions.

Dual-Layered Roof:

Image: The dual-layered galvanized steel roof provides superior airflow, ventilation, UV protection, and resistance to wind, rain, and snow.

The galvanized steel double roof offers excellent airflow and ventilation, effectively shielding you from UV rays while withstanding heavy snow, rain, and wind. The central net prevents debris from entering.

Versatile Curtains & Netting:

Image: The dual track design allows for independent movement of curtains and netting.

Crafted from 180g polyester, the curtains provide privacy and warmth. The 40g zippered netting ensures excellent airflow while keeping mosquitoes at bay. Both run on a dual track design, allowing independent operation. Extra Velcro straps are included to organize and secure the curtains and netting when not in use.

Multi-Purpose Hooks:

Image: The roof includes two types of hooks ('J' and 'U') for hanging various items.

Top hooks allow you to hang fans, lights, or other decorations, adding a personal touch to your space.

Maintenance

Regular maintenance will ensure the longevity and appearance of your Aoxun Hardtop Gazebo.

Cleaning:

- **Frame:** Clean the aluminum frame with a soft cloth, mild soap, and water. Avoid abrasive cleaners or harsh chemicals that could damage the powder coating.
- **Roof:** Periodically clear the galvanized steel roof of leaves, snow, or other debris to prevent accumulation and ensure proper drainage.
- **Curtains & Netting:** The polyester curtains and netting can be spot cleaned with mild soap and water. For deeper cleaning, they may be removed and hand washed. Ensure they are completely dry before reattaching to prevent mildew.

Seasonal Care:

- In areas with heavy snowfall, it is recommended to clear snow from the roof regularly to prevent excessive weight accumulation.
- During periods of strong winds or severe weather, ensure the gazebo is securely anchored. Consider removing curtains and netting to reduce wind resistance.
- Inspect all bolts and connections periodically to ensure they remain tight. Tighten as necessary.

Troubleshooting

This section addresses common issues you might encounter with your gazebo.

Assembly Difficulties:

- **Parts not aligning:** Double-check that you are using the correct parts for each step as per the manual's diagrams. Ensure all components are oriented correctly before tightening bolts. Do not overtighten bolts until the entire section is assembled.
- **Missing hardware:** Verify against the hardware list. If parts are genuinely missing, contact customer support.
- **Difficulty with roof panels:** Ensure the frame is perfectly square and level. Roof panels may require careful alignment and gentle persuasion to fit into tracks.

Stability Concerns:

- **Gazebo feels wobbly:** Ensure all bolts are fully tightened. Confirm the gazebo is anchored to a stable, level surface using appropriate methods (stakes or expansion bolts).
- **Wind damage:** Always secure the gazebo according to the wind resistance guidelines. In extreme weather, consider temporary disassembly or additional reinforcement.

If you encounter issues not covered here, please refer to the original instruction manual or contact Aoxun customer support.

Specifications

Below are the key specifications for your Aoxun Hardtop Gazebo (Model G30014):

Image: Detailed dimensions of the Aoxun 10' x 12' Hardtop Gazebo.

Feature	Detail
Brand	Aoxun
Model Number	G30014
Material	Aluminum frame, Galvanized Steel roof, 180g Polyester curtains, 40g Netting
Color	Gray
Product Dimensions (L x W x H)	144"L x 120"W x 115"H (12'L x 10'W x 9.65'H)
Floor Area	120 Square Feet
Occupancy	8-10 People
Water Resistance Level	Waterproof

UV Protection	50+ Ultraviolet Light Protection
Coating	Interpon AkzoNobel powder coat (scratch, peel, corrosion, rust resistant)

Warranty and Support

Aoxun is committed to providing high-quality products and excellent customer service. For any questions regarding your gazebo, including assembly, missing parts, or operational concerns, please contact our support team.
While specific warranty details are typically provided with your purchase documentation, Aoxun products are generally backed by a manufacturer's warranty covering defects in materials and workmanship. Please retain your proof of purchase for warranty claims.
For assistance, please refer to the 'Help Center' information included in your product packaging or visit the official Aoxun website for contact details.
