VENTY 2022

VENTY Portable Fan Instruction Manual

Model: 2022

INTRODUCTION

Thank you for choosing the VENTY Portable Fan. This wireless, battery-operated fan is designed for ultimate portability and convenience, featuring 4 fan speeds, integrated LED lighting, and a remote control. It is perfect for travel, home, office, or outdoor use, and can also function as a power bank for your devices.

This manual provides essential information for the safe and efficient operation of your VENTY Portable Fan. Please read it thoroughly before use and retain it for future reference.

SETUP

Unboxing and Initial Inspection

Your VENTY Portable Fan comes pre-assembled and stored within its protective carry case. Carefully remove the fan and accessories from the packaging. Inspect all components for any signs of damage. If any parts are missing or damaged, please contact customer support.

Charging the Fan

Before first use, fully charge the fan. The VENTY fan features a 16,000 mAh battery, providing up to 48 hours of operation on a single charge, and doubles as a power bank.

1. Locate the USB-C charging port on the fan's base. This is an upgraded single port for both input (charging the fan) and output (charging other devices).
2. Use one of the included USB cables (USB-C to A or USB-C to C).

3. Connect the cable to a compatible power adapter. For optimal charging, it is recommended to use a single-port charger, such as an Apple or Android charger, ideally a 27W Power Delivery (PD) type.
4. Plug the power adapter into a wall socket.
5. The fan can be used while charging.

Important Charging Notes:

- Avoid using multi-USB adapters or USB outlets for charging the fan.
- Do not use extension cords for charging.
- Using an underpowered charger (e.g., 5W) will significantly increase charging time.

Adjusting Fan Height and Orientation

The VENTY fan is designed to be highly adjustable, extending and folding for various uses.

- **Folding/Unfolding:** The fan folds compactly to 3.5 inches (9 cm) for storage and transport. To unfold, gently extend the telescopic stand.

- **Height Adjustment:** The fan can extend to over 3 feet (91 cm) in height. Pull the telescopic stand upwards to achieve the desired height.
- **Angle Adjustment:** The fan head can be manually tilted to direct airflow as needed.

MAINTENANCE

Cleaning the Fan

Regular cleaning ensures optimal performance and extends the life of your fan.

1. Ensure the fan is turned off and unplugged from any power source before cleaning.
2. To clean the fan blades, twist the front face plate counter-clockwise to remove it. This mechanism is tool-less for easy access.
3. Wipe the fan blades and the inside of the grille with a soft, damp cloth. Do not use abrasive cleaners or solvents.
4. Wipe the exterior of the fan with a dry or slightly damp cloth.
5. Once clean and dry, align the face plate and twist clockwise to secure it back in place.

Storage

When not in use, fold the fan into its compact form and store it in the included hard shell carry case. This protects the fan from dust and damage, making it ideal for travel.

TROUBLESHOOTING

If you encounter issues with your VENTY Portable Fan, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Fan does not turn on.	Battery is depleted.	Charge the fan fully using a compatible charger and wall socket.

Problem	Possible Cause	Solution
Fan does not charge.	Incorrect charger or power source used.	Ensure you are using a single-port wall charger (e.g., 27W PD type) directly into a wall socket. Avoid multi-port adapters or extension cords.
Short battery life.	Fan is consistently used on high speed settings.	Battery life is reduced at higher fan speeds. Use lower speeds for extended operation. Ensure the fan is fully charged before use.
Remote control not responding.	Remote battery depleted or obstruction.	Ensure there is no obstruction between the remote and the fan. The remote is magnetically attached to the fan base; ensure it is properly seated or try using it detached. (Note: The remote does not use replaceable batteries, it charges with the fan).
Fan makes unusual noise.	Obstruction in fan blades or dirty blades.	Turn off and unplug the fan. Remove the front grille and clean the blades. Check for any foreign objects.
