Below it, the included accessories are shown: AHD Rear Camera, Installation Tool, Microphone, Power Cable, RCA Cable, Mounting Accessories, 2 USB Cables, Camera Input Cable, User Manual, and GPS Antenna.

The package typically includes:

- SIXWIN Android 13 Car Radio Unit (9-inch touchscreen)
- AHD Rear Camera
- Installation Tool
- External Microphone
- Power Cable
- RCA Cable
- Mounting Accessories
- 2 USB Cables
- Camera Input Cable
- User Manual (this document)
- GPS Antenna

SETUP AND INSTALLATION

This section outlines the general installation process. Professional installation is recommended. Ensure the vehicle's power is disconnected before starting installation.

1. Pre-Installation Check

Before installing the new head unit, compare the back of your OEM car radio CD player with the provided image. If they match, additional wiring harnesses and CANBUS may be required, especially if your car has an original amplifier. Contact customer support if you encounter this situation to avoid sound issues.

Installation Effect

Note: If the your OEM car radio CD back the same as the picture, you need to purchase additional wiring harnesses and protocol boxes, please find us .

Image: Top part shows the SIXWIN car radio installed in a Hyundai Elantra dashboard. The bottom part shows close-ups of car wiring harnesses, the back of an OEM car radio, and the original car dashboard layout before installation.

2. Wiring Connections

Connect the provided power cable, RCA cables, USB cables, camera input cable, and GPS antenna to the corresponding ports on the car radio unit. Ensure all connections are secure.

3. Mounting the Unit

Carefully mount the car radio into the dashboard using the provided accessories. Ensure it is securely

fastened and does not obstruct any vehicle controls.

4. Backup Camera Installation

Install the AHD backup camera at the rear of your vehicle. Connect the camera's video output to the "Camera Input" on the car radio and its power to the vehicle's reverse light circuit for automatic activation.

Image: Top part illustrates steering wheel control buttons and their functions on the car radio display. Bottom part shows a backup camera view on the car radio screen, highlighting features like HD image, waterproof design, night vision, and wide-angle view.

OPERATING INSTRUCTIONS

1. Initial Power On and System Setup

After installation, turn on your vehicle's ignition. The car radio will boot up. Follow any on-screen prompts for initial setup, such as language selection and time zone.

2. Wireless CarPlay & Android Auto

This unit supports both wireless and wired CarPlay and Android Auto. (Note: Samsung phones may not be

supported for Android Auto.)

- **For CarPlay:**

1. Establish a Bluetooth connection between the car stereo and your iPhone.
2. Open the "Zlink5" application on the car stereo.
3. Enjoy wireless Apple CarPlay.

- **For Android Auto:**

1. Download the Android Auto app on your Android phone.
2. Establish a Bluetooth connection between the car stereo and your Android phone.
3. Open the "Zlink5" application on the car stereo.
4. Enjoy wireless Android Auto.

Once connected, you can access navigation, phone contacts, messages, music, and use voice control (Siri or Google Assistant).

Wireless Carplay & Android Auto

Carplay

Wireless & wired connections

1. Bluetooth connection between car stereo and smart phone
2. Turn on App "Zlink5" on car stereo
3. Enjoy Wireless Apple Carplay

Android Auto

Wireless & wired connections

1. Download Android Auto app on your phone
2. Bluetooth connection between car stereo and smart phone
3. Turn on App "Zlink5" on car stereo
4. Enjoy Wireless Android Auto (Not supported Samsung phones)

Image: This image illustrates the steps for connecting to Wireless CarPlay and Android Auto, showing the car radio display with respective interfaces and connection instructions.

3. Mirror Link Function

Mirror Link allows you to display your smartphone's screen on the car radio. It supports both iOS (via WiFi) and Android (via WiFi/USB) devices.

Image: Top part shows the Mirror Link function, displaying a smartphone screen mirrored onto the car radio. Bottom part demonstrates the Split Screen function, showing two applications running simultaneously on the car radio display.

4. GPS Navigation

The unit has built-in GPS navigation and supports both online and offline maps. Download offline maps for navigation without an internet connection. Real-time road conditions can be accessed when connected to WiFi.

Image: Top part displays the GPS navigation interface with a map view. Bottom part shows the WiFi function, with various app icons indicating internet connectivity.

5. WiFi Connectivity

Connect the car radio to a WiFi hotspot (e.g., from your smartphone) to access online content, browse the internet, and use online applications.

6. Bluetooth Hands-free & Music

Pair your smartphone via Bluetooth for hands-free calling and streaming music. The external microphone ensures clear call quality. You can also download phonebooks to the unit.

FM RDS Radio

Bluetooth Call & Music

Image: Top part shows the FM radio interface with frequency display and preset stations. Bottom part illustrates Bluetooth connectivity for calls and music, with a phone dialer and music player interface.

7. FM Radio

Access FM radio with 18 preset stations (FM 87.50-108.0 MHz). Scan and save your favorite stations for easy access to news and music.

8. EQ Function

Adjust audio settings using the built-in Equalizer (EQ) to customize the sound output to your preference, enhancing your driving audio experience.

Image: This image shows the EQ function interface on the car radio, allowing users to adjust sound frequencies and select preset audio modes like Pop, Jazz, Rock, etc.

9. Steering Wheel Control (SWC)

Configure the steering wheel controls to manage functions like switching songs, adjusting volume, and answering calls directly from your steering wheel. To set up SWC, navigate to the settings menu and enter password "000000" to learn the controls.

10. Split Screen Function

Utilize the split-screen feature to run two applications simultaneously, such as navigation and music playback, for enhanced multitasking.

High Definition 1080P

26UI Themes

Image: Top part highlights the 1080P Full HD touchscreen display. Bottom part showcases various 26 UI desktop themes available for customization on the car radio.

11. UI Desktop Themes

The car radio comes with 26 built-in UI Desktop Themes. You can select your preferred theme to personalize the interface.

MAINTENANCE

To ensure the longevity and optimal performance of your SIXWIN car radio, follow these maintenance guidelines:

- **Cleaning the Screen:** Use a soft, lint-free cloth to gently wipe the touchscreen. Avoid abrasive cleaners or solvents that could damage the display.
- **Software Updates:** Periodically check for software updates to ensure you have the latest features and bug fixes. Updates can usually be found through the system settings or the manufacturer's website.
- **Environmental Conditions:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.

TROUBLESHOOTING

If you encounter issues with your car radio, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
No Sound Output	◦ Check all wiring connections, especially the power and speaker cables. ◦ If your car has an original amplifier, ensure you have the correct additional wiring harnesses and CANBUS. Contact customer support for assistance. ◦ Verify the volume is not muted or set too low.
CarPlay/Android Auto Connection Issues	◦ Ensure Bluetooth is enabled on both your phone and the car radio. ◦ Make sure the "Zlink5" app is open on the car stereo. ◦ For Android Auto, confirm the app is installed on your phone. ◦ Note that some Samsung phones may not be fully supported. ◦ Try restarting both your phone and the car radio.
GPS Signal Loss / Inaccuracy	◦ Ensure the GPS antenna is properly installed and has a clear view of the sky. ◦ Check if offline maps are downloaded for your region if you are in an area with poor network coverage.
Steering Wheel Controls Not Working	◦ Go to the steering wheel control settings in the car radio menu. ◦ Enter the password "000000" and follow the on-screen instructions to re-learn the controls. ◦ Ensure the SWC wires are correctly connected during installation.
Screen Freezes or Becomes Unresponsive	◦ Perform a soft reset by pressing the reset button (if available) or by turning off the vehicle's ignition and restarting. ◦ If the issue persists, contact customer support.
