Fossil ES5350

Fossil Women's Blue Dive Quartz Stainless Steel Three-Hand Watch

Model: ES5350

Introduction

This manual provides essential instructions for the proper use, setup, and maintenance of your Fossil Women's Blue Dive Quartz Stainless Steel Three-Hand Watch (Model ES5350). Please read this manual thoroughly before using your watch to ensure optimal performance and longevity.

The Fossil Dive collection watch is designed with a durable stainless steel case and band, featuring a quartz movement and a water resistance rating of 10 ATM (100 meters / 330 feet).

Product Overview

Figure 1: Front view of the Fossil Women's Blue Dive Quartz Watch, showcasing the gold-tone stainless steel case and band, white dial with crystal indices, and three-hand display.

Figure 2: Side view of the watch, highlighting the crown for time adjustment and the unidirectional rotating bezel.

Figure 3: Rear view of the watch band, showing the fold-over clasp with the Fossil logo.

Figure 4: A woman wearing the Fossil Women's Blue Dive Quartz Watch, demonstrating its appearance on the wrist.

Setup

1. Setting the Time

1. **Pull out the crown:** Gently pull the crown (located on the right side of the watch case, as shown in Figure 2) out to the first position.
2. **Adjust the time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the correct time.
3. **Push in the crown:** Once the time is set, push the crown back into its original position to start the watch movement.

2. Adjusting the Band

The stainless steel bracelet band features a fold-over clasp. Links can be removed by a qualified jeweler or watch technician to achieve a customized fit. Do not attempt to remove links yourself without proper tools and knowledge to avoid damage.

Operating Instructions

Reading the Time

The watch features a three-hand analog display: an hour hand, a minute hand, and a second hand. The luminous hands and hour markers enhance readability in low-light conditions.

Using the Unidirectional Rotating Bezel

The bezel rotates in one direction (counter-clockwise) and can be used to measure elapsed time. Align the zero marker on the bezel with the minute hand at the start of an event. The minute hand's position relative to the bezel's markings will then indicate the elapsed time.

Maintenance

Cleaning

- Wipe the watch case and band with a soft, damp cloth. For stainless steel, a mild soap solution can be used, followed by rinsing with clean water and drying thoroughly.
- Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the watch's finish and seals.

Water Resistance (10 ATM / 100 meters / 330 feet)

This watch is suitable for bathing, swimming, or snorkeling. It is**not** resistant enough to withstand scuba diving or high-impact water sports. Ensure the crown is fully pushed in before any water exposure.

Battery Replacement

The quartz movement is powered by a battery. When the watch stops or the second hand begins to jump erratically (indicating a low battery), it is recommended to have the battery replaced by an authorized Fossil service center or a

professional watch repair shop. This ensures proper sealing and maintains water resistance.

Storage

When not in use, store your watch in a cool, dry place, away from direct sunlight and extreme temperatures. The original Fossil tin (see Figure 5) provides excellent protection.

Figure 5: Example of Fossil watch tins, suitable for storage.

Troubleshooting

Problem	Possible Cause	Solution
Watch not running	Battery depleted	Replace battery at an authorized service center.
Time is incorrect	Crown not pushed in; time not set correctly	Ensure crown is fully pushed in. Reset the time as per "Setting the Time" instructions.
Condensation inside crystal	Exposure to extreme temperature changes or compromised water resistance	Seek immediate professional service to prevent internal damage.

Problem	Possible Cause	Solution
Band feels too tight/loose	Band not sized correctly	Visit a jeweler or watch technician to adjust band links.

Specifications

Model Number: ES5350

Case Size: 36mm

Band Width: 18mm

Movement: Quartz, 3-hand analog display

Crystal: Hardened Mineral Crystal

Water Resistance: 10 ATM (100 meters / 330 feet)

Case Material: Stainless Steel

Band Material: Stainless Steel

Clasp Type: Fold-over clasp

Dial Color: White with black accents

Bezel: Unidirectional Rotating
